

General recommendations

Keep this in mind:

- Do not start the engine without the clutch and clutch drum fitted.
- Do not touch hot parts such as the silencer and clutch before they have cooled sufficiently to avoid burn injuries.
- Avoid getting petrol on bare skin or in the mouth.
- Wipe up spilled oil immediately from the floor to avoid slipping and subsequent injury.
- Do not use tools which are worn or fit badly, e.g. nuts and screws.
- Never start the engine indoors. Exhaust fumes are toxic!
- + Always work on a tidy work bench.
- + Always work methodically to be sure that all parts are correctly assembled and that screws and nuts are tightened.
- + Use protective cream on your hands. It reduces the risk of infection and enables dirt to be more easily washed off. Prolonged contact with motor oil can be hazardous to health.
- + Use special tools when so recommended in order to work correctly.

Fire hazard

Handle petrol with respect since it is highly inflammable.

Do not smoke and make sure that there are no naked flames or sparks in the vicinity.

Make sure that there is a functioning fire extinguisher in the vicinity.

Do not attempt to extinguish a petrol fire with water.

Toxic fumes

Read the instructions carefully when using cleaning liquids.

Make sure that there is adequate ventilation when handling petrol, trichloroethylene and other viscous liquids.

The engine exhaust fumes are toxic. Test run the engine only when there is good ventilation, preferably outdoors.

WARNING

The engine exhaust from this product contains chemicals known to the State of California to cause cancer, birth defects or other reproductive harm.

Special tools

Some work operations in this workshop manual require the use of special tools. In each section where this is appropriate the tool and order number are illustrated.

We recommend the use of special tools partly to avoid personal injury and partly to eliminate expensive damage to the components in question.

502 51 02-01

Sealing surfaces and gaskets

Make sure that all sealing surfaces are clean and free from the residue of old gaskets. Use a tool which will not damage the sealing surface when cleaning it. Scratches and irregularities are removed with a fine, float cut file.

Sealing rings

Always replace a sealing ring which has been dismantled. The sensitive sealing lip can easily be damaged and result in poor sealing capacity. The surface which the seal seals must also be completely undamaged. Lubricate the sealing lip with grease before it is fitted and make sure that it is not damaged, e.g. by shoulder and splines on a shaft. Use tape or conical sleeve as protection. It is important that the sealing ring is correctly turned for it to function as intended.
