Introduction to Joomla!

Introduction

Joomla! is one of the most popular, free and open-source content management systems (CMS) available for publishing web content. It is user friendly, extendable, multilingual, accessible, responsive, search engine optimised and so much more.
Joomla! 4 is the current version, released in August 2021.

There are thousands of free and commercial Joomla! Extensions available from third parties for all sorts of special purposes. However, Joomla! comes with enough core Extensions to allow you to create a fully functional website out of the box in a few minutes. It is best to familiarise yourself with the core Joomla capabilities before looking for third party Extensions.

Joomla! must be installed on a web server, either on a hosting service to make your content available to the rest of the world or on your own laptop or desktop computer for private testing purposes.

Joomla! Architecture

A Joomla! installation consists of the files used to manage and display content and a database where most of the content is stored. There are separate interfaces for the public Site and for the site Administrator, although many administrator functions can be accomplished with the site interface. The interface appearance is generated by a set of
