## **Journal Management Rss:**

**Social Media Management** Amy Van Looy, 2022-05-03 This is the second edition of the undergraduate textbook Social Media Management which extends the original edition's scope beyond the business angle. The textbook continues with the perspective of organizations not individuals and clarifies the impact of social media on their different departments or disciplines while also exploring how organizations use social media to create business value. To do so, the book pursues a uniquely multi-disciplinary approach by embracing IT, marketing, HR, and many other fields. While the first edition was inspired by the rise of social media tools, the second edition is characterized by a digital economy with increasing digitalization efforts due to newly emerging technologies in Industry 4.0 and the COVID-19 pandemic. Readers will benefit from a comprehensive selection of extended topics including strategies and business models for social media influencer marketing, viral campaigns, social CRM, employer branding, e-recruitment, search engine optimization, social mining, sentiment analysis, crowdfunding, and legal and ethical issues. Each chapter starts with one or more teaser questions to arouse the reader's interest, which will be clarified per topic. The second edition also provides ample self-test materials and reflection exercises.

**National Conference on Management of Modern Libraries (NACML)** K. Shivananda Bhat, Mahabaleshwara Rao, Rekha D. Pai, 2014-07-15 With the advent of the information and communication technologies, traditional library activities are undergoing transformation in a big way. Modern library's collection includes a vast array of information resources, databases, electronic journals, e-books, digital images, institutional repositories, etc. To manage a modern library, library professionals need to have awareness and knowledge on management of electronic resources, federated and discovered tools, for single click search, literature techniques, application of RFID and other technologies, user needs, and knowledge on soft skills, etc. Keeping these perspectives and issues in mind, the National Conference on Management of Modern Libraries (NACML) was organized by SEARCH, The Health Science Library, in association with the department of Library and Information Science, Manipal University, Manipal. The main objective of the conference was to provide an opportunity to LIS professionals to explore the ways and means to manage the modern libraries where electronic resources are playing an important role in meeting the information needs of the users and to explore, discuss, and share ideas and knowledge related to innovative modern library management systems to meet the needs of the changing environment. In five technical sessions under five different categories titled Technologies for Management, Best Practice in Modern Libraries, digital libraries, and Role of Library Professionals in Management of Modern Libraries, held over the two days, total 51 papers were presented at the conference. Various challenges and issues related to management of modern libraries were discussed in the technical sessions, and some of the authors shared the best practices of their libraries. The author highlighted the importance of digital libraries and stressed the needs of various skills to work in a digital environment. The papers presented in the conference have been edited and brought out in the form of a conference proceedings.

**Citation Management Tools**

Nancy R. Glassman, 2018-11-23 With the rise of scholarly communication proper citation and attribution practices have become more important than ever. Citation management software is an essential tool for meeting this challenge. Look no further than the proliferation of free and fee based packages on the market: new programs and updated versions of existing software offering innovative features seem to pop up all the time. Busy students and researchers do not have the time or energy to test drive all the available options in order to make an informed decision regarding the selection of the right tool to manage their references. After finding the right tool they need someone to help them use it properly. Librarians must be able to help their patrons navigate the many alternatives and effectively use the special features of the software they ultimately select.

**Citation Management Tools: A Practical Guide for Librarians** was written to help librarians, teachers, and writers demystify the complex world of citation management software. Topics include: An overview of citation management software including what it can and cannot do; Advice on selecting the right program for the right researcher and the right project; A comparison of citation managers on the market; Leveraging citation managers to provide library services; Citation management as a collaboration and networking tool; Ways to use citation managers to facilitate proper citation practices and avoiding plagiarism; Citation managers to tame the unruly folders on your desktop; Mobile citation management; Future trends. This book focuses on the four citation managers commonly used in libraries: EndNote, Mendeley, RefWorks, and Zotero, but other noteworthy tools are also described.

**Citation Management Tools: A Practical Guide for Librarians** provides librarians with the essential skills and information required to support the use of citation managers at their libraries and explore creative ways to use these tools.

**Blogging and RSS** Michael P. Sauers, 2006 In this helpful book, author, Internet trainer, and blogger Michael P. Sauers, MLS, shows how blogging and RSS technology can be easily and effectively used in the context of a library community. Sauers covers everything librarians need to know, beginning with an introduction to the blogging phenomenon and a review of the library blogosphere. He recommends his favorite blogs, shares the opinions and advice of top librarian bloggers, and offers step-by-step instructions for creating, publishing, and syndicating a blog using free Web-based services, software, RSS feeds, and aggregators. A recommended reading list, examples of feed code, and a glossary round out the book.

**Book jacket: Knowledge Discovery, Transfer, and Management in the Information Age** Jennex, Murray E., 2013-11-30 With the advent of electronic databases, information technologies, and the Internet, organizations now more than ever have easy access to all the knowledge they need to conduct their affairs. Identifying the useful information in all that data, however, can pose a challenge. *Knowledge Discovery, Transfer, and Management in the Information Age* brings together the latest empirical research in knowledge management practices and information retrieval strategies to assist organizations in effectively and efficiently utilizing the data at their disposal. Academics, managers, researchers, and professionals within the field of knowledge management will make use of this book to increase their understanding of best practices in the manipulation of information resources.
