<b>Teacher Input (Explanation &amp; Elaboration):</b> Draw a T-chart on the board to differentiate rotation and revolution. State that, right now, the earth is rotating on a 23.5 degree tilt called an axis (explain that students will learn more about the axis shortly). Draw on the T-chart a picture of the earth with a diagonal line going through it and arrows depicting its rotation; write "Spin or Turn" above or below the drawing, and label the diagonal line as the axis. State that, as the earth rotates, one side experiences daytime (such as right now), while the other side is experiencing nighttime. Write "day and night" on the T-chart. Ask students how long a day is. Convey that if there are 24 hours in a day, then it takes 24 hours for the earth to complete one rotation. Write "24 hours or one day" on the T-chart.	Participate and listen actively to one another and the teacher's input. Answer questions provided by the teacher. Stand and spin slowly in place counterclockwise to represent the rotation of the earth. Walk in a circle around the teacher counterclockwise representing the earth revolving around the sun.
