## **Military Skills Development System 2015 2016:**

*South Africa's Post-Apartheid Military* Lindy Heinecken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment and retention, military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment, gender equality and mainstreaming the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged. HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become lost in transition and transformation, spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence security and civil-military relations of countries around the world. *Annual Report South Africa. Department of Defence, 2016* [The Value of TVET in Advancing Human Development and Reducing Inequalities](#)

Randa Hilal, 2022-04-25 This book examines the contribution of Vocational Education and Training to advancing human development and reducing inequality. It uses the example of Palestine as a case study rich in multi-layered inequalities, some of which are experienced in the region and worldwide while others are specific to adverse conditions. The case of Palestine provides fertile ground for understanding inequality and human development and for echoing the developed knowledge through to the understanding of Vocational Education and Training and Human Development globally. The book brings original theoretical approaches, evidence of the value of Vocational Education and Training and contributes to academic debates as well as provides empirical evidence for practitioners and donor community.

**The Models of Skill Acquisition and Expertise Development** Raman K. Attri, 2019-03-30 The book offers condensed summaries of twenty-three major skill acquisition and expertise development models presented by leading researchers during the last half a century of classic and new research. This book presents new researchers in learning, training, cognitive sciences or education disciplines with a big picture starting point for their literature review journey. The book presents an easy-to-understand taxonomy of twenty-three models giving new researchers a good bird's-eye view of existing models and theories. They can decide which direction to dig further. The reviews in this book are complemented with over 200 authentic sources which a researcher reads for a detailed and deeper dive and set the direction for further exploration. This book would also act as an essential reference for training, learning professionals and instructional designers to design research-based training curriculum to develop the skills of their staff. Chapter 1 of the book elaborates on how the processes of learning skill

acquisition and expertise development are interwoven Chapter 2 presents a classification system to categorize various models reviewed in the literature under five groups Chapter 3 describes twelve models of skill and expertise acquisition which are represented in the form of stages used frequently in learning training and performance literature The chapter also briefly discusses each model s implications toward developing the skills and expertise of a less proficient individual to a higher level of proficiency Chapter 4 reviews practice time or task based models which are theories or models suggesting that acquisition of knowledge skills development of expertise and performance improvement is a function of nature of the practice amount of time spent on the task and task type Chapter 5 presents the factor based models suggesting the interplay of several factors that influence the acquisition of knowledge skills development of expertise and performance improvement Chapter 6 embarks on describing expert modeling based models suggesting modeling an expert through elicitation or guidance for the acquisition of knowledge skills development of expertise and performance improvement Chapter 7 covers some newer movements toward cognition based models which are theories or models focusing on mechanisms of cognitive learning for the acquisition of knowledge skills development of expertise and performance improvement Chapter 8 concludes the book by integrating views from various thought leaders to explain a famous staged skill acquisition model

Greg Austin, 2018-05-15 This book offers the first benchmarking study of China's response to the problems of security in cyber space. There are several useful descriptive books on cyber security policy in China published between 2010 and 2016. As a result, we know quite well the system for managing cyber security in China and the history of policy responses. What we don't know so well and where this book is useful is how capable China has become in this domain relative to the rest of the world. This book is a health check, a report card on China's cyber security system in the face of escalating threats from criminal gangs and hostile states. The book also offers an assessment of the effectiveness of China's efforts. It lays out the major gaps and shortcomings in China's cyber security policy. It is the first book to base itself around an assessment of China's cyber industrial complex, concluding that China does not yet have one. As Xi Jinping said in July 2016, the country's core technologies are dominated by foreigners. Cyber Warfare and Terrorism: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2020-03-06 Through the rise of big data and the internet of things, terrorist organizations have been freed from geographic and logistical confines and now have more power than ever before to strike the average citizen directly at home. This coupled with the inherently asymmetrical nature of cyberwarfare, which grants great advantage to the attacker, has created an unprecedented national security risk that both governments and their citizens are woefully ill prepared to face. Examining cyber warfare and terrorism through a critical and academic perspective can lead to a better understanding of its foundations and implications. Cyber Warfare and Terrorism: Concepts, Methodologies, Tools, and Applications is an essential reference for the latest research on the utilization of online tools by terrorist organizations to communicate with and recruit potential extremists and examines effective countermeasures employed by law enforcement agencies to defend against such threats. Highlighting a range of topics such as cyber threats, digital intelligence, and counterterrorism, this multi-volume book is ideally designed for law enforcement, government officials, lawmakers, security analysts, IT specialists, software developers, intelligence and security practitioners, students, educators, and researchers. European Foreign Policy in a Decarbonising World Sebastian Oberthür, Dennis Tänzler, Emily Wright, Gauri Khandekar, 2021-12-24 Contributing to the emerging literature on the geopolitical and foreign policy implications of decarbonisation and energy transition processes, this book sheds light on the future of the European Union's EU external relations under decarbonisation. Under the Paris Agreement on climate change adopted in 2015, governments are committed to phasing out the emissions of carbon dioxide and other greenhouse gases over the coming decades. This book addresses the many questions around this process of decarbonisation through detailed analyses of EU external relations with six fossil fuel exporting countries: Nigeria, Indonesia, Azerbaijan, Colombia, Qatar, and Canada. The authors systematically examine the six countries' varying dependence on fossil fuels, the broader political and security context, current relations with the EU, and the potential for developing these towards decarbonisation. In doing so, they put forward a series of findings that should hold across varying circumstances and provide a steppingstone to enrich and inspire further research on foreign policy external

relations and international relations under decarbonisation The book also makes an important contribution to understanding the external implications of the 2019 European Green Deal This volume will be of great interest to students and scholars of European environmental and climate policy climate diplomacy energy policy foreign policy and climate energy geopolitics The Open Access version of this book available at <http://www.taylorfrancis.com/books/e/9781003183037> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license *Fundamentals of Human Resource Management* Robert N.
