**South Africa's Post-Apartheid Military** Lindy Heineken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment and retention, military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment, gender equality and mainstreaming, the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged, HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become lost in transition and transformation, spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence, security and civil-military relations of countries around the world.

**African Peace Militaries** David Francis, 2017-08-16 This book provides a critical understanding of the emerging role of African militaries in peacetime democratic Africa This book departs from the dominant perspective which simply presents the military as an enemy of democracy because of the

history and legacy of unending military coups and interventions in civilian politics In the context of Africa the military has been blamed or largely held responsible for instigating wars armed conflicts political violence poverty and underdevelopment due to bad governance and mismanagement of the state Drawing from diverse case studies across Africa including Nigeria Rwanda Uganda Ethiopia and Egypt this volume presents the argument that though the military has played a negative and sometimes destructive role in undermining constitutional rule and the overthrow of democratic civilian governments the same military now operating in a changed global environment is making effort to support the development of democracy and democratic consolidation as well as remain subjected to civilian democratic oversight and control Notwithstanding the real challenge for this emerging trend of African peace militaries is the extent to which they are able to fulfil on a predictable and consistent basis their constitutional mandate to defend the people against elected autocrats in Africa who try to use the military to perpetuate themselves in power This work fills a critical gap in the literature and will be of much interest to students of African security and politics peace and conflict studies security studies and IR in general

**Open Participatory Security** Jesse Paul Lehrke, 2017-08-15 Our modern security systems have recently come under a lot of criticism as too bureaucratic and unadaptable too secretive and untrustworthy and too obsessed with information technology rather than human needs Yet listing failures is easy security is never perfect The question is why current approaches fail and whether there are viable alternatives The root of their shortcomings is in the interaction of the very pillars of our security system in the contemporary context While our enemies have adopted the technologies of the Information Age changing how they organize and fight these same technologies have only created more vulnerabilities for states Governments have been generally unwilling to maximize their use of these technologies because it would require the wider release of information and the opening of organizational structures to include society in security making Yet countering diffuse modern threats striking deep into our states and across our economies requires mobilizing the diffuse skills and variation of modern society Open approaches for mobilizing participation and coproduction have the capabilities needed to improve contemporary security policy making problem solving and provision Moreover open participatory security can be effective not only for technical security but also for restoring trust among the citizens and rebuilding the legitimacy of the state
