

Graduation Speech

Thank you (name of person who introduced you) .

[*Look around the room.*] Graduates . . . family members . . . and staff, it is an honor to be part of this celebration, the (number) graduation ceremony at (name) School.

It is such a pleasure to share in the intensity of emotions filling this (auditorium, stadium) as you who are graduating close this chapter of your life's story.

Parents, you are probably wondering where the years have gone. As you marvel at your sons' and daughters' accomplishments, it doesn't seem that long ago when these young adults we honor today were toddling off to start kindergarten.

Of course, living through those years between kindergarten and graduation may have seemed like an eternity for the students . . . and for some parents as well.

[*Look at graduates.*] You are the Class of 2010. You graduate in a century still in its infancy . . . at a time in history when our world is dealing with enormous challenges . . . but at a time when the opportunities created by those challenges have never been greater.

You are technology natives . . . born and educated in a technological world that was only found in science fiction stories when many of us in this room were in school. You Twitter and tweet . . . read books and news on line . . . and your electronic social networking has shrunk the known world.

You are the generation that will take the technology of today to new and dizzying dimensions.

You are the ones who will bring solutions to environmental concerns . . . global warming . . . conservation of natural resources . . . and development of alternative energy sources . . . the issues that my generation is only now identifying.

And who knows? There may come a time that some of you live on a space station circling the earth.

Someone among you may find the cure for cancer . . . or other debilitating afflictions. [*Pause.*]

So (*tonight/this afternoon*) you are poised to start a new chapter of your life's story.

Armed with the skills and knowledge you've attained . . . I can tell you are eager to tackle this next phase, whatever it might be. For some, college or technical schools will be your next stop. Some are heading straight to the workforce. Some have chosen military service.

A More Perfect Military Diane H. Mazur, 2010-11-08 Surveys show that the all volunteer military is our most respected and trusted institution but over the last thirty five years it has grown estranged from civilian society Without a draft imperfect as it was the military is no longer as representative of civilian society Fewer people accept the obligation for military service and a larger number lack the knowledge to be engaged participants in civilian control of the military The end of the draft however is not the most important reason we have a significant civil military gap today **A More Perfect Military** explains how the Supreme Court used the cultural division of the Vietnam era to change the nature of our civil military relations The Supreme Court describes itself as a strong supporter of the military and its distinctive culture but in the all volunteer era its decisions have consistently undermined the military s traditional relationship to law and the Constitution Most people would never suspect there was anything wrong but our civil military relations are now as constitutionally fragile as they have ever been **A More Perfect Military** is a bracingly candid assessment of the military s constitutional health It crosses ideological and political boundaries and is challenging even unsettling to both liberal and conservative views It is written for those who believe the military may be slipping away from our common national experience This book is the blueprint for a new national conversation about military service

Lead Me, Follow Me, Or Get Out of My Way Mark R. Shulman, 2012 This monograph explains why robust civil military relations matter and discusses how they are evolving Part I examines the jurisprudence that has reshaped civil military relations The author maintains that since the Vietnam era the U S Supreme Court has hewn the armed forces from general society in order to create a separate and more socially conservative sphere Part II argues that the nation s polity is in decline and that the increasingly politicized armed forces may force a change in government Part III asks Where do we go from here This monograph attributes a thinning of civilian control over the military to specific legal and political decisions They explain some of the most important implications of this transformation and offer proposals about how to improve that critical relationship for the sake of enhancing the effectiveness of the armed forces and the vitality of the republic This monograph goes on to examine briefly the evolving great power politics the effects new technologies have on long standing distinctions and borders and the relative rise of non state actors including al Qaeda three sets of exogenous factors that inevitably drive changes in the civil military relationship In the end this monograph points to a more ambitious enterprise a complete reexamination of the relationship between force and society

Keitner, 2012-02-01 The Paradoxes of Nationalism explores a critical stage in the development of the principle of national self determination the years of the French Revolution during which the idea of the nation was fused with that of self government While scholars and historians routinely cite the French Revolution as the origin of nationalism they often fail to examine the implications of this connection Chim ne I Keitner corrects this omission by drawing on history and political theory to deepen our understanding of the historical and normative underpinnings of national self determination as a basis for international political order Based on this analysis Keitner constructs a framework for evaluating nation based claims in contemporary world politics and identifies persistent theoretical and practical tensions that must be taken into account in contemplating proposals for civic nationalism and alternative nonnational models Survival Taylor & Francis Group, 2002-02-15 **The Military Academy**, 1912 **Military Law Review** United States.
