narrow escape from torture and his house arrest and physical though not intellectual decline Wootton also reveals much that is new from Galileo's premature Copernicanism to a previously unrecognized illegitimate daughter and controversially rejects the long established belief that Galileo was a good Catholic Absolutely central to Galileo's significance and to science more broadly is the telescope the potential of which Galileo was the first to grasp Wootton makes clear that it totally revolutionized and galvanized scientific endeavor to discover new and previously unimagined facts Drawing extensively on Galileo's voluminous letters many of which were self censored and sly this is an original arresting and highly readable biography of a difficult remarkable Renaissance genius Selected as a Choice Outstanding Academic Title in the Astronautics and Astronomy Category Fascinating reading With this highly adventurous portrayal of Galileo's inner world Wootton assures himself a high rank among the most radical recent Galileo interpreters Undoubtedly Wootton makes an important contribution to Galileo scholarship America magazine Wootton's biography is engagingly written and offers fresh insights into Galileo's intellectual development Standpoint magazine *Willing's Press Guide*, 1999 Coverage of publications outside the UK and in non English languages expands steadily until in 1991 it occupies enough of the Guide to require publication in parts **A Copyright Gambit** Sunimal Mendis, 2019-07-05 European memory institutions are repositories of a wealth of rare documents that record public domain content These documents are often stored in dark archives to which members of the public are granted limited access resulting in the public domain content recorded therein being relegated to a form of forgotten knowledge Digitisation offers a means by which such public domain content can be made speedily and easily accessible to users around the world For this reason it has been hailed as the harbinger of a new digital renaissance This book examines the topical issue of the need to preserve exclusivity over digitised versions of rare documents recording public domain content Based on data gathered through an empirical survey of digitisation projects undertaken by fourteen memory institutions in five European Union Member States it argues for the introduction of exclusive rights in digitised versions of rare documents recording public domain textual content as a means of incentivising private sector investment in the digitisation process It concludes by presenting a detailed proposal for a European Union Regulation that would grant memory institutions a limited term related right in digitised versions of rare documents held in their collections subject to stringent exceptions and limitations that are designed to safeguard user interests Types and Emblems Charles Haddon Spurgeon, 1873 Tools and Algorithms for the Construction and Analysis of Systems Dirk Beyer, Marieke Huisman, Fabrice Kordon, Bernhard Steffen, 2019-04-03 This book is Open Access under a CC BY licence This book LNCS 11429 is part III of the proceedings of the 25th International Conference on Tools and Algorithms for the Construction and Analysis of Systems TACAS 2019 which took place in Prague Czech Republic in April 2019 held as part of the European Joint Conferences on Theory and Practice of Software ETAPS 2019 It's a special volume on the occasion of the 25 year anniversary of TACAS *Creating a Successful E-information Service* Sheila Pantry, Peter Griffiths, William Oldfield, 2003 To be successful

Handbook of Space Law addresses the legal and regulatory aspects of activities in outer space and major space applications from a comprehensive and structured perspective. It fundamentally addresses the dichotomy between the state-oriented character of *Science, Method, and Argument in Galileo*. Maurice A. Finocchiaro, 2021-08-28. This book collects a renowned scholar's essays from the past five decades and reflects two main concerns: an approach to logic that stresses argumentation, reasoning, and critical thinking; and that is informal, empirical, naturalistic, practical, applied, concrete, and historical, and an interest in Galileo's life and thought, his scientific achievements, Inquisition trial, and methodological lessons in light of his iconic status as father of modern science. These republished essays include many hard-to-find articles, out-of-print works, and chapters which are not available online. The collection provides an excellent resource of the author's lifelong dedication to the subject. Thus, the book contains critical analyses of some key Galilean arguments about the laws of falling bodies and the Copernican hypothesis of the earth's motion. There is also a group of chapters in which Galileo's argumentation is compared and contrasted with that of other figures such as Socrates, Karl Marx, Giordano Bruno, and his musicologist father, Vincenzo Galilei. The chapters on Galileo's trial illustrate an approach to the science vs. religion issue which Finocchiaro labels para-clerical and conceptualizes in terms of a judicious consideration of arguments for and against Galileo and the Church. Other essays examine argumentation about Galileo's life and thought by the major Galilean scholars of recent decades. The book will be of interest to scholars in philosophy, logic, philosophy of science, history of science, history of religion, philosophy of religion, argumentation, rhetoric, and communication studies. **Century Types of English Literature Chronologically Arranged** George William McClelland, 1925. **Data Analytics for Drilling Engineering** Qilong Xue, 2019-12-30.
