

Use this phylogenetic tree to answer the questions below:

1. Interpret the phylogenetic tree shown below to answer the following questions: [1% pt each = 3 pts total]

- Highlight the node** (branch point) that represents the most recent common ancestor of A and B.
- Which species is the outgroup? Highlight the one: A B C D E F G
- Which species have trait 1? Highlight all who do: A B C D E F G
- Which species have trait 2? Highlight all who do: A B C D E F G
- Which species is/are most closely related to E? D
- Which species is/are most closely related to F? D, E, and G

2. Impose a taxonomy on the g tree above. Position boxes and labels below to indicate different possible groupings on this tree. Any correct answer will earn you points. [1% pts]

*Speciesism in Biology and Culture* Brian Swartz, Brent D. Mishler, 2022-12-16 This open access book explores a wide ranging discussion about the sociopolitical cultural and scientific ramifications of speciesism and world views that derive from it In this light it integrates subjects across the natural sciences social sciences and humanities The 21st century western world is anthropocentric to an extreme we adopt unreasonably self centered and self serving ideas and lifestyles Americans consume more energy resources per person than most other nations on Earth and have little concept of how human ecology and population biology interface with global sustainability We draw upon religion popular culture politics and technology to justify our views and actions yet remain self centered because our considerations rarely extend beyond our immediate interests Stepping upward on the hierarchy from racism speciesism likewise refers to the view that unique natural kinds species exist and are an important structural element of biodiversity This ideology manifests in the cultural idea that humans are distinct from and intrinsically superior to other forms of life It further carries a plurality of implications for how we perceive ourselves in relation to nature how we view Judeo Christian religions and their tenets how we respond to scientific data about social problems such as climate change and how willing we are to change our actions in the face of evidence

**Biosciences on the Internet** Georges Dussart,2003-01-24 Most biological science departments run general skills courses for their first years which include some combination of a range of topics from lab skills writing and presentation to basic maths statistics and IT The IT section of these courses tend to include some internet coverage but the trend towards learning how to find access manage and

correctly cite online resources is rapidly becoming a required necessity for every student throughout their undergraduate career. At present there are no internet guides that specifically target this audience despite the increasing importance placed on the use of online resources and the difficulties students encounter trying to make effective use of the information that is available. There are a lot of resources on the internet and students especially first years can feel swamped. As well as needing a guide, students need support to help them identify good reliable information on the net. They also need guidance in administering the organisation of their searches and the materials that they discover on the internet. This simple guide will help bioscience students to access the information they need on the internet and to make the most efficient and effective use of their time online.
