Institute for Government Research, 1932 **The Concept of Liberty in the Age of the American Revolution** John Phillip Reid, 1988 Liberty was the most cherished right possessed by English speaking people in the eighteenth century It was both an ideal for the guidance of governors and a standard with which to measure the constitutionality of government both a cause of the American Revolution and a purpose for drafting the United States Constitution both an inheritance from Great Britain and a reason republican common lawyers continued to study the law of England As John Philip Reid goes on to make clear liberty did not mean to the eighteenth century mind what it means today In the twentieth century we take for granted certain rights such as freedom of speech and freedom of the press with which the state is forbidden to interfere To the revolutionary generation liberty was preserved by curbing its excesses The concept of liberty taught not what the individual was free to do but what the rule of law permitted Ultimately liberty was law the rule of law and the legalism of custom The British constitution was the charter of liberty because it provided for the rule of law Drawing on an impressive command of the original materials Reid traces the eighteenth century notion of liberty to its source in the English common law He goes on to show how previously problematic arguments involving the related concepts of licentiousness slavery arbitrary power and property can also be fit into the common law tradition Throughout he focuses on what liberty meant to the people who commented on and attempted to influence public affairs on both sides of the Atlantic He shows the depth of pride in liberty English liberty that pervaded the age and he also shows the extent unmatched in any other era or among any other people to which liberty both guided and motivated political and constitutional action **Proceedings of the Triennial Convocation**
