about deep seated change in teaching methods It raises weighty questions such as how teacher preparation programs should begin the process of instilling habits of exploration experimentation research and learning in their pre service teachers so that they continuously work at updating and upgrading their teaching practices It is a message to curriculum developers policy makers and the public at large that lasting teacher professional development takes more time and support than the more immediate workshop approaches It raises many questions about how teachers learn and how they can keep their practices fresh and innovative throughout their careers A study guide designed to elicit deep thought and discussion of the many issues raised by this story accompanies the book The book and study guide are a valuable supplemental text for courses addressing teacher learning professional development workplace learning teacher change constructivist teaching practices mentoring educational administration and educational policy The study guide is also a tool to stimulate discussion among groups of readers such as pre service and practicing teachers school and district administrators educational policy makers and the public at large who are interested in educational reform
