The Oxford Handbook of Early Modern European History, 1350-1750 Hamish M. Scott, 2015 This Handbook re-examines the concept of early modern history in a European and global context. The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching, research and scholarly publishing. More recently, however, the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned. The Oxford Handbook of Early Modern European History 1350-1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing. It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study. The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity. Volume II is devoted to Cultures and Power, opening with chapters on philosophy, science, art and architecture, music and the Enlightenment. Subsequent sections examine Europe beyond Europe with the transformation of contact with other continents during the first global age and military and political developments, notably the expansion of state power.

Becoming a Woman in the Age of Letters Dena Goodman, 2009 In 18th century France, letter writing became extremely fashionable, particularly amongst women. In this work, Dena Goodman opens up the world of these women through the letters which they wrote. Concentrating on the letters of four women from different social backgrounds, she shows how they came to womanhood through their writing.

British-French Exchanges in the Eighteenth Century Kathleen Hardesty Doig, Dorothy Medlin, 2009-05-05 France and Great Britain so close geographically but separated by language, culture and history had been exchanging merchandise, visitors, rulers and ideas for hundreds of years before the eighteenth century. The flow of traffic only quickened during this period and became a flood in the direction of Great Britain during the decade following the Revolution. While certain of these exchanges, such as Voltaire's sojourn abroad, have been studied in detail, others are coming into focus only as scholars study secondary figures in the host country and the interactions of various groups with its citizens. *British-French Exchanges in the Eighteenth Century* gathers together fourteen recent essays by scholars from Great Britain and the United States who have examined various parameters of the subject. Correspondences and translations are obvious forms of

cultural sharing and are in play in many of the essays Others recount and analyse the stories of persons who actually visited the other country in circumstances ranging from pure tourism to emigration to a hostage exchange A final group of essays treats intellectual influences in realms as diverse as encyclopaedism cultural analysis connoisseurship and cosmopolitanism in the arts The volume is appropriate for collections in history literature and culture

Letters of Transmission Bart Marshall, 2023-11-06

You hold in your hand a unique treasure There are thousands of spiritual teachers but true Zen masters those who can transmit who can midwife a student to awakening are rare Some may write books or essays but their real work is done individually with students in person Alfred Pulyan 1896 1966 was one of those rare Zen masters who can transmit but his method of

transmission came not through personal contact but rather through an exchange of letters with his students. He worked primarily by mail and had notable success triggering enlightenment in serious students through the power and rapport of his letters. A fortunate side effect of his method is that it is written down and thus potentially available to others providing one can find any of his letters. Those collected here are from a correspondence with Richard Rose in 1960 and 1961 and provide an invaluable look under the covers as a Zen master goes about his thankless work. Rose was already awake when he heard about Pulyan's ability having had a definitive spiritual experience in 1947 at age thirty. He contacted Pulyan for the purpose of learning how to transmit what he'd become pretending to be a seeker while continually pressing Pulyan to reveal method. At times in these letters Pulyan seems to be onto him but with unbelievable patience and incredible mastery he works to crack Rose's nut and at the same time tells him what he's doing and how and why he's doing it. Pulyan wrote his letters in longhand with extensive margin notes. For this book I have edited them to include those notes in the main text and made other minor edits to help the letters read more smoothly. Rose's letters are not included in this book except for his initial inquiry that kicks things off. Not much is known about Pulyan's life and in fact he's somewhat of an enigma. Much of what is known he tells us himself in these letters. Conflicting reports have him being born either in New York or London but at any rate he turned up in New York City sometime after World War I and lived most of his life there. He is of an age where he might have served in the war but no record of it exists. From these letters we know he studied mathematics and worked as an accountant, office manager and executive. In the late 1950s he and his wife Madeline bought 12 acres in rural Connecticut where they and some friends settled in. One of these friends was the young woman who was Pulyan's teacher and who was responsible for his realization. He'll tell you the story in one of these letters. Pulyan's only known published writings are articles in *The Aberree*, a journal in circulation from 1954 through 1965. The best known of these, *The Penny That Blots Out the Sun*, is included at the end of this book.

The United Kingdom and Spain in the Eighteenth Century Manuel-Reyes García Hurtado, 2024-09-23. This book seeks to bridge a gap in the historiography of Spain and Great Britain by arguing that while the eighteenth century witnessed periods of tension, conflict and hostility between the two powers, their relationship remained multifaceted and significant in other spheres. Throughout the eighteenth century Spain and Great Britain passed through phases of open warfare, armed peace and deep suspicion. The British capture of Gibraltar and Menorca dealt a severe blow to the newly established Bourbon dynasty in Spain. Even in times of war, however, not all communication channels were closed, with numerous formal and informal contacts being made despite the volatile political climate and enmities. The contributors of this book go beyond the well-known animosity and conflicts to explore the spectrum of interactions encompassing cultural exchange, traditional diplomacy, trade and espionage, plus a multitude of other facets. This book is a valuable resource for researchers and students interested in the complex relations between Great Britain and Spain during the eighteenth century, as well as for a broader audience of historians and both undergraduate and postgraduate students of

Enlightenment's Frontier Fredrik Albritton Jonsson, 2013-06-18 **DIV** Enlightenment s Frontier is the first book to investigate the environmental roots of the Scottish Enlightenment What was the place of the natural world in Adam Smith s famous defense of free trade Fredrik Albritton Jonsson recovers the forgotten networks of improvers and natural historians that sought to transform the soil plants and climate of Scotland in the eighteenth century The Highlands offered a vast outdoor laboratory for rival liberal and conservative views of nature and society But when the improvement schemes foundered toward the end of the century northern Scotland instead became a crucible for anxieties about overpopulation resource exhaustion and the physical limits to economic growth In this way the rise and fall of the Enlightenment in the Highlands sheds new light on the origins of environmentalism div **Prescribing Ovid** Yasmin Haskell, 2013-03-28 Gerard

Nicolaas Heerkens was a cosmopolitan Dutch physician and Latin poet of the eighteenth century. A Catholic, he was in many ways an outsider on his own turf, the peat country of Protestant Groningen, and looked to Voltaire's Paris much as Ovid in exile had looked to Rome. An indefatigable traveller and networker, Heerkens mixed freely with philosophers, physicians, churchmen and antiquarians. This book reconstructs his Latin works and networks and reveals in the process a virtually unexplored corner of eighteenth century culture: the Latin Enlightenment.

The Power of Knowledge Jeremy Black, 2014-01-14

Information is power. For more than five hundred years the success or failure of nations has been determined by a country's ability to acquire knowledge and technical skill and transform them into strength and prosperity. Leading historian Jeremy Black approaches global history from a distinctive perspective, focusing on the relationship between information and society and demonstrating how the understanding and use of information have been the primary factors in the development and character of the modern age. Black suggests that the West's ascension was a direct result of its institutions and social practices for acquiring, employing and retaining information and the technology that was ultimately produced. His cogent and well-reasoned analysis looks at cartography and the hardware of communication, armaments and sea power, mercantilism and imperialism, science and astronomy as well as bureaucracy and the management of information, linking the history of technology with the history of global power while providing important indicators for the future of our world.
