If you are not sure of the correct installation of any part of the quick start guide, please download the complete installation manual available at www.autopageusa.com. This quick start guide is a brief summary for professional installers that are familiar with the installation and operation of the remote start system. Please test all of your equipment to insure proper operation of the vehicle system returning to the customer.

For additional technical support, please call 800-888-4343, and visit for the first available technician. Technical support hours are Monday through Saturday from 8:00 to 5:00 Pacific Standard Time.

The Remote Starter with Remote Entry System has been designed to be installed on transportation vehicles with an automatic transmission (AT).

Should install the vehicle system on a vehicle with an automatic transmission.

This system must be installed and tested through a safety switch so it will not start in any forward or reverse gear.

Some automatic transmission vehicles having other AT vehicles with a remote starter may have a mechanical-type gear safety switch instead of electrical safety switch. The mechanical type does not interrupt the starter circuit when the transmission is in any gear and does not allow the 100% level of safety required for remote starting operation. Therefore, our system should never be installed on any vehicle that uses a mechanical-type gear safety switch.

Once you install this system, you must verify that the vehicle will not start in any forward or reverse gear regardless of the type of vehicle.

Read the operation manual for operating.

Do not install any component near the battery, gas pedal or shifting linkage.

Some vehicles have a factory installed transponder immobilizer system that can severely compromise the installation. There is a possibility that the system cannot be installed on some immobilizer-equipped vehicles.

Many vehicles have an ABS or air system. The vehicle code will do not provide any sense of the ABS system.

Disconnect the air battery before beginning work on the vehicle.

Check battery grounds before driving any holes. Ensure that no wiring harness or other components are located between the points that would otherwise be damaged.

Do not use conventional jump box, battery or any wiring that wiring, i.e. repair parts will possibly obstruct connectivity into the alarm system and may result in false alarm or increased operation. The suggested installing of connection points.

Install the wiring neatly under carpets or within wire to prevent possible damage to wires.
