Framework II Manual Ashton-Tate, Inc. Staff, Donald H. Beil, Beil, 1991 The book provides support for an introductory computer applications course by discussing the most popular personal computer tools often called applications software. These tools include word processing, spreadsheets, databases, outlining, business graphics, spell checking, and integrated software. The book is divided into three parts. Part One, Getting Started, provides a broad overview of the contents of the material presented in the book, describes how to set up and install the software to run on the specific hardware the reader will use, describes how to start and end a computer session with the Student Edition of Framework II, and explains how to obtain on-line help from the product. Part Two, Tutorials, is the central portion of the book. It includes ten tutorials developed to continue in TofC.
