an explicit connection between language testing and educational inequalities at the higher education level. With its focus on higher education, this research is a fresh reminder of the need to continuously revisit and unsettle inequalities that are embedded in education systems. In the South Pacific context, this study reveals the current issues including medium of instruction, challenges, lack of teaching and learning resources, teacher shortages, and language barriers. Goundar's research seeks new answers to the problem of academic English language skills faced by undergraduate students. Since English is a second language for the majority of students in Fiji, and as the quality of education varies between urban and rural schools, this cumulatively impacts students' acquisition of English skills and consequently their university performance. The important questions posed and addressed in this book are as follows: What are the language implications of colonisation on education in the South Pacific? What resources and learning opportunities are provided in schools to promote equal access to education content for students from non-English speaking backgrounds? How do students from different schooling backgrounds in Fiji cope with an English language mediated university learning environment? Do educational inequalities manifest in the performance of students from all schooling backgrounds or are they confined to specific sociocultural zones? Drawing on a unique dataset from a context in the Global South, this book provides new insights for a more holistic approach to examining academic language proficiency and the use of language testing. English Language mediated Settings and Educational Inequalities. Language Education Policy Agendas in the South Pacific is suitable for postgraduate students in language policy and planning, multilingual language policies for schools, medium of instruction studies, and language testing and South Pacific studies.

Handbook of the Crimes of the Powerful Gregg Barak, 2015-06-05 Across the world, most people are well aware of ordinary criminal harms to person and property. Often committed by the powerless and poor, these individualized crimes are catalogued in the statistics collected annually by the FBI and by similar agencies in other developed nations. In contrast, the more harmful and systemic forms of injury to person and property committed by powerful and wealthy individuals, groups, and national states are neither calculated by governmental agencies nor annually reported by the mass media. As a result, most citizens of the world are unaware of the routinized crimes of the powerful, even though they are more likely to experience harms and injuries from these types of organized offenses than they are from the atomized offenses of the powerless. Research on the crimes of the powerful brings together several areas of criminological focus involving organizational and institutional networks of powerful people that commit crimes against workers, marketplaces, taxpayers, and political systems, as well as acts of torture, terrorism, and genocide. This international handbook offers a comprehensive, authoritative, and

structural synthesis of these interrelated topics of criminological concern It also explains why the crimes of the powerful are so difficult to control Edited by internationally acclaimed criminologist Gregg Barak this book reflects the state of the art of scholarly research covering all the key areas including corporate global environmental and state crimes The handbook is a perfect resource for students and researchers engaged with explaining and controlling the crimes of the powerful domestically and internationally
