

Kuwait - Telecoms, Mobile, Broadband and Forecasts

Description:

Kuwait has a progressive telecoms market but needs more competition.

Kuwait has a well developed and progressive telecoms market, offering LTE services, ADSL, FIB and WDM services. However Kuwait is one of the few remaining countries in the Middle East where a government ministry, the Ministry of Communications (MoC), acts as both monopoly operator of fixed-line services and regulator. Some competition has been introduced in data services and internet provision but not in fixed-line voice.

There have been recent positive moves in the direction of market liberalisation however, with the approval of the first reading of the bill passed in parliament in March 2014, paving the way for the potential introduction of an independent telecoms regulator.

Mobile telecommunications is much the most dynamic part of the Kuwait market. Three operators share the market including Zain, Viva and Watanija which was rebranded as Ooredoo Kuwait in 2014 ahead the completion of a network modernisation for the company.

Mobile represents the majority of total broadband connections in Kuwait and fixed broadband penetration is low, blamed on underinvestment in infrastructure and lack of competition in the fixed sector. In regards to home broadband penetration, Kuwait is falling behind other leading Middle Eastern countries.

Key telecom parameters: 2012; 2014:
