Kzn Grade 12 September 2014 Economics:

The Legacy of a Troubled Past Bernard Cros, Mathilde Rogez, Gilles Teulie, 2022-06-07 Since the advent of democracy in 1994 South Africa has been engaged in an unprecedented exercise of national soul searching torn between the need to lay to rest centuries of racial conflict and the desire to come to terms with its traumatic history This book asks whether the country has begun to turn the corner on the legacy of collective hurt To do so it ranges in scope across 350 years of South African history encompassing the struggle against the apartheid regime the downfall of white supremacy the Truth and Reconciliation Commission and the first 25 years of democracy up to more recent movements such as RhodesMustFall or the inquests into the 2012 Marikana massacre that point to the persistence of traumatic memory in contemporary society The authors assembled here set out to analyse the representation of such memory how it has been woven into narratives recorded preserved and questioned and how issues of individual and collective responsibility have been grafted onto it through the visual arts literature political discourse and public action In focusing on memory along with its derived forms of memorialization collective memory nostalgia or post memory our contributors pose a fundamental question is South Africa finally coming to the end of the post apartheid transition period Do the decades of memory work on racial violence and repression examined here hold out hope for the nation to make peace with its past How South Africa Works Jeffrey Herbst, Greg Mills, 2015-07-01 The overwhelming challenge that South Africa faces and has to date failed to address is unemployment which falls especially on African youths who were promised a better future after 1994 If the current unemployment challenge is not addressed it will be impossible to sustainably lift many millions of people out of poverty How South Africa Works reviews the country's major economic achievements over the past two decades Through numerous interviews with politicians business leaders and analysts it examines the challenges and opportunities across key productive sectors including agriculture manufacturing services and mining illustrative of the policy challenges that leaders face It scrutinises the social grant and education systems to understand if South Africa has established mechanisms for people not only to escape destitution but be ready to be employed and identifies steps that some of South Africa's most notable entrepreneurs have taken to build world class enterprises Recognising the essential challenge to cultivate more employers to employ people How South Africa Works concludes by offering an agenda and active steps for greater competitiveness for government business and labour Wrecking Ball Stu Woolman, 2021-04-29 Wrecking Ball explores in an unprecedented manner a decalogue of wicked problems that confronts humanity Nuclear proliferation climate change pandemics permanent technological unemployment Orwellian public and private surveillance social media that distorts reality cyberwarfare the fragmentation of democracies the inability of nations to cabin private power the failure of multinational institutions to promote collaboration and the deepening of autocratic rule in countries that have never known anything but extractive institutions Collectively or even severally these wicked problems constitute crises that could end civilisation Does this list

frighten you or do you blithely assume that tomorrow will be just like yesterday Wrecking Ball shows that without an inclusive system of global governance the collective action required to solve those wicked problems falls beyond the remit of the world's 20 inclusive democracies 50 flawed democracies and 130 extractive elitist autocracies Flawed democracies and autocracies that already struggle to produce goods necessary for their own citizens to flourish are simply incapable of committing to international arrangements that address the existential threats posed by the decalogue of wicked problems This then is our children's inheritance Dystopias far far worse than the polities that we ourselves have known What if anything can mitigate the harms that are our legacy Wrecking Ball offers as an answer a ground breaking analysis of South Africa's political economy It demonstrates that this country's elitist and extractive political and economic institutions not only make resolution of ongoing domestic crises unattainable likewise they make meaningful responses to wicked problems impossible Smart people think they have all the answers Without laboring under any such illusions Martin Luther King Jr eloquently opined The arc of the moral universe is long but it bends towards justice But what will happen King would acidly ask if we continue to dawdle and simply run out of time Wrecking Ball similarly operates under no such smart pretenses and undeterred and unmatched ventures into terrains traversed by truly great political economists Smith Ricardo Marx and Keynes By knitting together what we all know to be the facts with cutting edge theory in economics sociology history and political science the book paints an unflinching portrait of where we are and where we are headed Are we ready to be honest with ourselves about the likely future of this overheated overpopulated planet

The Unresolved National Question in South Africa Edward Webster, Karin Pampallis, John Mawbey, Jeremy Cronin, 2017-03-01 This volume examines the way in which various strands of left thought have addressed the National Question The re emergence of debates on the decolonisation of knowledge has revived interest in the National Question which began over a century ago and remains unresolved Tensions that were suppressed and hidden in the past are now being openly debated Despite this the goal of one united nation living prosperously under a constitutional democracy remains elusive This edited volume examines the way in which various strands of left thought have addressed the National Question especially during the apartheid years and goes on to discuss its relevance for South Africa today and in the future Instead of imposing a particular understanding of the National Question the editors identified a number of political traditions and allowed contributors the freedom to define the question as they believed appropriate in other words to explain what they thought was the Unresolved National Question This has resulted in a rich tapestry of interweaving perceptions The volume is structured in two parts The first examines four foundational traditions Marxism Leninism the Colonialism of a Special Type thesis the Congress tradition the Trotskyist tradition and Africanism The second part explores the various shifts in the debate from the 1960s onwards and includes chapters on Afrikaner nationalism ethnic issues black consciousness feminism workerism and constitutionalism The editors hope that by revisiting the debates not popularly known among the scholarly mainstream this volume will become a catalyst

for an enriched debate on our identity and our future

Struggling to Make the Grade: A Review of the Causes and Consequences of the Weak Outcomes of South Africa's Education System Mr. Montfort Mlachila, Tlhalefang Moeletsi, 2019-03-01

While South Africa has made significant improvements in basic and tertiary education enrollment the country still suffers from significant challenges in the quality of educational achievement by almost any international metric. The paper finds that money is clearly not the main issue since the South Africa's education budget is comparable to OECD countries as a percent of GDP and exceeds that of most peer sub-Saharan African countries in per capita terms. The main explanatory factors are complex and multifaceted and are associated with insufficient subject knowledge of some teachers, history, race, language, geographic location, and socio-economic status. Low educational achievement contributes to low productivity, growth, and high levels of poverty, unemployment, and inequality. Drawing on the literature, the paper sketches some policy considerations to guide the debate on what works and what does not. *Minerals Yearbook*, 2011

Food Insecurity and Public Health Louise Ivers, 2015-05-06. Affecting more than 800 million people, food insecurity is a global problem that runs deeper than hunger and undernutrition. In addition to the obvious impact on physical well-being, food insecurity can result in risky coping strategies, increased expenditures on medical costs or transportation, and mental health issues. A review of the concepts. **Fourth International Handbook of Globalisation, Education and Policy Research**

Joseph Zajda, 2024-12-04. This handbook provides a global synthesis of on-going research in education and policy change during the last decade. It examines discourses of globalisation from the perspectives of the global North and global South. Major theories of globalisation and education policy reforms employed in the handbook are classified into two broad categories: structuralist and post-structuralist. The handbook, while examining the impact of global trends in different societies, cultures, and educational settings, attempts to synthesise different meta-theories of globalisation and their impact on societies and educational systems. It discusses the continued interaction of global, national, and local forces and influences, especially the importance of standards and quality-driven education reforms, the need to overcome inequality of access to quality schools, and aims at providing quality education for all students. In addition, the impact of neo-liberal ideology on education is examined in terms of its impact on ongoing standards-driven education reforms globally. The handbook analyses neo-liberalism in education and its focus on increasing global competitiveness, accountability, efficiency, quality standards, driven policy reforms, and educational stratification. The impact of globalisation on education policy and reforms is a strategically significant issue for us all. The unifying conceptual framework used in the handbook to critique the strategic significance of globalisation is grounded in discourse CDA and critical theory. The work offers the latest findings concerning major issues in education and policy directions such as global social and economic inequality, neo-liberal standard-driven education, and policy reforms, performing schools, the performing culture, education for human rights and social justice, new perspectives on education for sustainability, dominant and effective models of values education in schools, and the ubiquitous impact of
