Geometric patterns

When we represent a number pattern with physical objects or a diagram, we get a geometric pattern.

Just like with numeric patterns, we can extend geometric patterns, find a rule and determine values and positions of terms.

It is often helpful to represent the numerical values from a geometric pattern in a table.

Example:

The following pattern is made of matches. Examine it and answer the questions that follow:

Structure 1

Structure 2

Structure 3

1. Describe the pattern.

- We are starting with a triangle made of 3 matches and for each new structure, a new triangle, also made of 3 matches, is added.
- The number of matches in the structure equals the structure number multiplied by 3.

2. Draw the fourth structure.

3. Complete the table:

Structure	1	2	3	4	10	1	1
Number of matches	a.	b.	c.	d.	e.	f.	g.

a. 3

b. 50

c. 27
