Archaeological Heritage Ippolito, Alfonso, 2016-08-27 Cultural heritage is a vital multifaceted component of modern society To better protect and promote the integrity of a culture certain technologies have become essential tools The Handbook of Research on Emerging Technologies for Architectural and Archaeological Heritage is an authoritative reference source for the latest scholarly research on the use of technological assistance for the preservation of architecture and archaeology in a global context Focusing on various surveying technologies for the study analysis and protection of historical buildings this book is ideally designed for professionals researchers upper level students and practitioners **Digital Modernism**

Heritage Lexicon Cristiana Bartolomei, Alfonso Ippolito, Simone Helena Tanoue Vizioli, 2021-08-11 The book investigates the theme of Modernism 1920 1960 and its epigones as an integral part of tangible and intangible cultural heritage which contains the result of a whole range of disciplines whose aim is to identify document and preserve the memory of the past and the value of the future Including several chapters it contains research results relating to cultural heritage more specifically Modernism and current digital technologies This makes it possible to record and evaluate the changes that both undergo the first one from a material point of view the second one from the research point of view which integrates the traditional approach with an innovative one The purpose of the publication is to show the most recent studies on the modernist lexicon 100 years after its birth moving through different fields of cultural heritage from different forms of art to architecture from design to engineering from literature to history representation and restoration The book appeals to scholars and professionals who are involved in the process of understanding reading and comprehension the transformation that the places have undergone within the period under examination It will certainly foster the international exchange of knowledge that characterized Modernism Leica GPS1200 ,2008 *Natural Dam Lake Cuejdel in the Stânișoarei*

Mountains, Eastern Carpathians Alin Miha-Pintilie, 2018-03-27 This book presents an interdisciplinary study of Lake Cuejdel one of the youngest natural dam lakes in Romania Even though the overall study has a strong geographical approach it also includes limnological and hydrological studies The lake was formed in two phases Initially a small lake appeared in 1978 and then in 1991 a major landslide occurred that blocked the Cuejdel brook and a larger lake was formed The book covers various topics including the lacustrine basin the geological setting analyses of the physical chemical parameters water

dynamics flora and fauna and lake management This book is of interest for those working in freshwater science and ecology physical geography hydrology and limnology

Innovative Methods and Materials in Structural Health Monitoring of Civil Infrastructures Raffaele Zinno, Serena Artese, 2021-09-02 In the past when elements in structures were composed of perishable materials such as wood the maintenance of houses bridges etc was considered of vital importance for their safe use and to preserve their efficiency With the advent of materials such as reinforced concrete and steel given their relatively long useful life periodic and constant maintenance has often been considered a secondary concern When it was realized that even for structures fabricated with these materials that the useful life has an end and that it was being approached planning maintenance became an important and non negligible aspect Thus the concept of structural health monitoring SHM was introduced designed and implemented as a multidisciplinary method Computational mechanics static and dynamic analysis of structures electronics sensors and recently the Internet of Things IoT and artificial intelligence AI are required but it is also important to consider new materials especially those with intrinsic self diagnosis characteristics and to use measurement and survey methods typical of modern geomatics such as satellite surveys and highly sophisticated laser tools

Measurement and Monitoring Vytautas Giniotis, Anthony Hope, 2014-05-27 This book presents the main methods and techniques for measuring and monitoring the accuracy of geometrical parameters of precision Computer Numerically Controlled CNC and automated machines including modern coordinate measuring machines CMMs Highlights include Standard methods and means of testing together with methods newly developed and tested by the authors Various parameters such as straightness perpendicularity flatness pitch yaw and roll as well as the principal processes for measurement of these parameters Lists and tables of geometrical accuracy parameters together with diagrams of arrangements for their control and evaluation of measurement results Special methods and some original new devices for measurement and monitoring information measuring systems consisting of laser interferometers photoelectric raster encoders or scales etc and methods for the measurement and testing of circular scales length scales and encoders Methods for measuring small lengths gaps and distances between two surfaces Examples showing the suitability of mechatronic methods for high accuracy correction of machines and Particular attention is given to the analysis of ISO written standards of accuracy control terms and definitions and methods for evaluation of the measurement results during performance verification

Landslide Analysis and Early Warning Systems Benni Thiebes, 2012-01-21 Recent landslide events demonstrate the need to improve landslide forecasting and early warning capabilities in order to reduce related risks and protect human lives In this thesis local and regional investigations were carried out to analyse landslide characteristics in the Swabian Alb region and to develop prototypic landslide early warning systems In the local study area an extensive hydrological and slope movement monitoring system was installed on a seasonally reactivated landslide body located in Lichtenstein Unterhausen Monitoring data was analysed to assess the influence of rainfall and snow melt on groundwater conditions and the initiation of slope movements The coupled

hydrology slope stability model CHASM was applied to detect areas most prone to slope failures and to simulate slope stability using a variety of input data Subsequently CHASM was refined and two web based applications were developed a technical early warning system to constantly simulate slope stability integrating rainfall measurements hydrological monitoring data and weather forecasts and a decision support system allowing for quick calculation of stability for freely selectable slope profiles On the regional scale available landslide inventory data were analysed for their use in evaluation of rainfall thresholds proposed in other studies Adequate landslide events were selected and their triggering rainfall and snow melting conditions were compared to intensity duration and cumulative thresholds Based on the results a regional landslide early warning system was developed and implemented as a webbased application Both the local and the regional landslide early warning systems are part of a holistic and integrative early warning chain developed by the ILEWS project and could easily be transferred to other landslide prone areas Popular Photography ,1991-01
