Delivering Value with BIM Adriana Sanchez,Keith Hampson,Simon Vaux,2016-03-31

Building Information Modelling BIM is a global phenomenon which is gaining significant momentum across the world Currently there is little information on how to realise and monitor benefits from implementing BIM across the life cycle of a built environment asset This book provides a practical and strategic framework to realise value from implementing BIM by adapting Benefit Realisation Management theory It presents an approach for practitioners aiming to implement BIM across the life cycle of built environment assets including both buildings and infrastructure Additionally the book features wide ranging information about BIM the challenges of monitoring progress towards benefit goals and the greater context of implementation a set of dictionaries that illustrate how benefits can be achieved what the benefit flows are and the enabling tools and processes that contribute to achieving and maximising them a suite of measures that can serve to monitor progress with examples of how they have been used to measure benefits from BIM real world examples from across the world and life cycle phases that show how these benefits can be achieved and information on international maturity and competency

measures to complement the value realisation framework Including a blend of academic and industry input this book has been developed in close collaborative consultation with industry government and international research organisations and could be used for industry courses on BIM benefits and implementation for asset management or by universities that teach BIM related courses

Economic Woman Frances Raday, 2019-05-14 The author introduces the concept of economic woman and makes her visible in duality with and opposition to the exclusive model of economic man Economic man has epitomized neo liberal capitalism which embraces competition and maximization of profit resulting in a steep increase in economic inequality The book demonstrates that women s inequality is a crucial factor in economic inequality which cannot be fully understood without relating to women s situation and that economic woman cannot thrive in the conditions of economic inequality created under global neo liberalism Emphasising the international human rights guarantees of women s right to equality in all fields of life the author documents woman s increased participation in political public financial and corporate institutions employment and entrepreneurship with some women reaching high profile positions Nevertheless using global data she reveals that economic woman lags behind with a severe economic power deficit an unfulfilled promise of equal employment opportunity a gendered impact of poverty and barriers to gender equality in the family The book analyses the trap of women s increased burden of breadwinning in the context of discriminatory laws and practices infrastructural failures and policy gaps which preempt achievement of gender equality in economic life The book is intended for the general reader academics students policy makers and NGOs It shows economic woman at a global crossroads between a universal paradigm of gender equality and pervasive barriers to equal economic opportunity The author demonstrates that tackling gender inequality restoring welfare priorities and reducing economic inequality are inextricably linked Human rights and governments have a vital role to play in addressing them all to create a sustainable economic infrastructure for the lives of women and men

Biosafety Measures, Technology Risks and the World Trade

Organization Alessandra Guida, 2022-12-23 This book examines the work of the World Trade Organization WTO with a focus on the capacity of its judiciary to strike a reasoned balance between free trade in biotechnology and biosafety as to promote the 2030 Agenda for Sustainable Development and its Sustainable Development Goals By adopting an innovative interpretation of the precautionary principle and proportionality analysis the work offers normative suggestions to develop what the author terms a constructive bridge of knowledge between decision makers scientists social experts and expert witnesses which can support a judicial balance by design rather than by chance Biotechnology is sometimes regarded as a panacea for modern day challenges such as feeding a growing world population and counteracting climate change problems and a means of offering significant economic opportunities However biotechnology can present uncertain though serious risks to human health and the environment i e biosafety Trading biotech products magnifies these risks and benefits globally This book explores the topical though still underexplored question of how to find a point of equilibrium between the

revolutionary advancement offered by technology and the need to safeguard biosafety from uncertain though potentially irreversible technology risks It offers a thorough analysis of normative judicial and epistemic issues hindering a reasoned balance between trade and non trade interests under the WTO The work offers practical relevance for the resolution of legal disputes in contexts of uncertainty as well as innovative theoretical contributions It will be a valuable resource for policymakers working on precautionary governance and management scholars in the areas of trade law human rights law and environmental law law students and practitioners as well as NGOs working in the field of new technologies biosafety sustainability and food safety
