United States. National Transportation Safety Board,2007 On August 27 2006 about 0606 35 eastern daylight time Comair
flight 5191 a Bombardier CL 600 2B19 N431CA crashed during takeoff from Blue Grass Airport Lexington Kentucky The
flight crew was instructed to take off from runway 22 but instead lined up the airplane on runway 26 and began the takeoff
roll The airplane ran off the end of the runway and impacted the airport perimeter fence trees and terrain The captain flight
attendant and 47 passengers were killed and the first officer received serious injuries The airplane was destroyed by impact
forces and postcrash fire The flight was operating under the provisions of 14 Code of Federal Regulations Part 121 and was
en route to Hartsfield Jackson Atlanta International Airport Atlanta Georgia Night visual meteorological conditions prevailed
at the time of the accident The National Transportation Safety Board determines that the probable cause of this accident was
the flight crewmembers failure to use available cues and aids to identify the airplane s location on the airport surface during
taxi and their failure to cross check and verify that the airplane was on the correct runway before takeoff Contributing to the
accident were the flight crew s nonpertinent conversation during taxi which resulted in a loss of positional awareness and the
Federal Aviation Administration s FAA failure to require that all runway crossings be authorized only by specific air traffic
control ATC clearances The safety issues discussed in this report focus on the need for 1 improved flight deck procedures 2
the implementation of cockpit moving map displays or cockpit runway alerting systems 3 improved airport surface marking
standards and 4 ATC policy changes in the areas of taxi and takeoff clearances and task prioritization Safety
recommendations concerning these issues are addressed to the FAA P x A Dictionary of Military and Technological
