Teaching Transhumanism Engelbert Thaler,2021-05-31 Onco mice and cloned sheep drones and auto automobiles neuro enhancement and prosthetic therapy Is transhumanism a movement that epitomizes the most daring courageous imaginative and idealistic aspirations of humanity Ronald Bailey 2004 or rather the world s most dangerous idea Francis Fukuyama 2009 This volume attempts to elucidate what we understand by the term transhumanism what topics and problems we face what media are suitable for classroom use what lesson scenarios seem effective what benefits we may reap and what challenges we have to cope with when we teach transhumanism in English language classes

Philosophy through Film Amy Karofsky,Mary M. Litch,2014-07-11 Many of the classic questions of philosophy have been raised illuminated and addressed in celluloid In this Third Edition of *Philosophy through Film* Mary M Litch teams up with a new co author Amy Karofsky to show readers how to watch films with a sharp eye for their philosophical content Together the authors help students become familiar with key topics in all of the major areas in Western philosophy and master the techniques of philosophical argumentation The perfect size and scope for a first course in philosophy the book assumes no prior knowledge of philosophy It is an excellent teaching resource and learning tool introducing students to key topics and figures in philosophy through thematic chapters each of which is linked to one or more focus films that illustrate a philosophical problem or topic Revised and expanded the Third Edition features A completely revised chapter on Relativism now re titled Truth with coverage of the correspondence theory the pragmatist theory and the coherence theory The addition of four new focus films *Inception* *Moon* *Gone Baby Gone* *God on Trial* Revisions to the General Introduction that include a discussion of critical reasoning Revisions to the primary readings to better meet the needs of instructors and students including the addition of three new primary readings excerpts from Bertrand Russell s *The Problems of Philosophy* from William James *Pragmatism A New Way for Some Old Ways of Thinking* and from J L Mackie s *Evil and Omnipotence* Updates

and expansion to the companion website including a much expanded list of films relevant to the various subfields of philosophy. Films examined in depth include Hilary and Jackie, The Matrix, Inception, Memento, Moon, I Robot, Minority Report, Crimes and Misdemeanors, Gone Baby Gone, Antz, Equilibrium, The Seventh Seal, God on Trial, Leaving Las Vegas. The Human Genome Project in College Curriculum Aine Donovan, Ronald Michael Green, 2008. Begun formally in 1990, the U.S. Human Genome Project's HGP goals were to identify all the 20,000 to 25,000 genes in human DNA, determine the sequences of the three billion chemical base pairs that make up human DNA, store this information in databases, improve tools for data analysis, and transfer related technologies to the private sector. It was the first large scientific undertaking to address potential issues that arose from project data and opened up vast possibilities for the use of genetic data and the alteration of our genetic makeup. This volume is the first to address the diverse range of ethical issues arising from the HGP and enables professors to bring this critically important topic to life in the classroom. *Technology and Society: A Philosophical Guide* James Gerrie, 2018-05-30. Technology and Society provides an up-to-date introduction to the basic issues that have come to define the philosophy of technology. What is technology? Does technology control our lives? What is technology's relation to ethics? How does technology influence us? Is the widespread belief in technological progress justified? Later sections of the book examine the application of philosophy of technology to social issues such as climate change, urban sprawl, and automation. Major issues and arguments are presented in an accessible and non-technical fashion, giving the reader a firm foundation in the field. **Just Genes** Carol Isaacson Barash, 2007-12-30. Advances in genetics research, largely though not entirely spawned by the Human Genome Project, have led to a broad array of new technologies that promise to revolutionize life as we have known it. Medicine and agriculture are already starting to utilize new technologies to greatly improve disease prevention and treatment and food production. Yet these improvements often raise ethical questions that are not easy to untangle. Some have gone as far as to argue that certain applications such as embryonic stem cell research threaten the very fiber of our moral compass. While the application of scientific advances to better humankind has always raised thorny ethical issues, the ethical impact of genetic advances arguably reaches a new height because the applicability of advances is exceptionally broad, deep, and potentially irreversible. To utilize such technologies could mean saving thousands of lives, but where and how do we draw the line? Here Barash sheds light on the actual ethical concerns surrounding various types of genetic technologies, introducing readers to the competing issues at stake in the arguments about the scientific application of the new technologies available and those on the horizon. She begins by illustrating the history of genetic advances, their societal applications, and the ethical issues that have arisen from those applications. Using case studies and examples throughout, she walks readers through the various considerations involved in a variety of areas related to the application of genetic technologies currently available and possible in the future. Covering topics ranging from stem cell research to genetically modified food, genetic mapping to cloning, this book offers a thoughtful approach to the complex issues at play in

the various fields of genetic technologies *Public Understanding of Science* ,2005 An international journal of research in the public dimensions of science and technology **Novel Beings** David R. Lawrence,Sarah Morley,2022-12-06 Novel Beings is a forward looking exploration into the divide between proactive and reactive regulatory approaches to the cross section of biotechnology and artificial intelligence AI research Addressing an innovative area of academic study Novel Beings questions how this research which has the potential to create new forms of morally valuable life could be regulated **More Than Things** Paul Louis Metzger,2023-08-08 In a world dominated by things we must work hard to account for one another s personhood Drawing a diverse set of thought leaders Paul Louis Metzger helps us navigate a pluralistic world through a personalist moral framework addressing issues such as abortion genetic engineering immigration drone warfare and more Medical Humanities Review ,1998 *Yonago Acta Medica* ,2003 Science John Michels (Journalist),2009 Black Space Adilifu Nama,2010-01-01 Winner Rollins Book Award Southwest Texas Popular Culture Association American Culture Association 2008 Science fiction film offers its viewers many pleasures not least of which is the possibility of imagining other worlds in which very different forms of society exist Not surprisingly however these alternative worlds often become spaces in which filmmakers and film audiences can explore issues of concern in our own society Through an analysis of over thirty canonic science fiction SF films including Logan s Run Star Wars Blade Runner Back to the Future Gattaca and Minority Report Black Space offers a thorough going investigation of how SF film since the 1950s has dealt with the issue of race and specifically with the representation of blackness Setting his study against the backdrop of America s ongoing racial struggles and complex socioeconomic histories Adilifu Nama pursues a number of themes in Black Space They include the structured absence token presence of blacks in SF film racial contamination and racial paranoia the traumatized black body as the ultimate signifier of difference alienness and otherness the use of class and economic issues to subsume race as an issue the racially subversive pleasures and allegories encoded in some mainstream SF films and the ways in which independent and extra filmic productions are subverting the SF genre of Hollywood filmmaking The first book length study of African American representation in science fiction film Black Space demonstrates that SF cinema has become an important field of racial analysis a site where definitions of race can be contested and post civil rights race relations re imagined
