Assistive Augmentation Jochen Huber, Roy Shilkrot, Pattie Maes, Suranga Nanayakkara, 2017-11-09 This book addresses Assistive Augmentation highlighting the design and development of assistive technologies user interfaces and interactions that seamlessly integrate with a user's mind body and behavior providing an enhanced perception Our senses are the dominant channel we use to perceive the world around us Whether they have impairments or not people often find themselves at the limits of their sensorial capabilities Some seek assistive or enhancing devices that enable them to carry out specific tasks or even transform them into a superhuman with capabilities well beyond the ordinary The overarching topic of this book revolves around the design and development of technologies and interfaces that provide enhanced physical sensorial and cognitive capabilities Assistive Augmentation The Assistive Augmentation community convened at an interdisciplinary workshop at the 2014 International Conference on Human Factors in Computing Systems CHI in Toronto Canada The community is comprised of researchers and practitioners who work at the junction of human computer interaction assistive technology and human augmentation This edited volume which represents the first tangible outcome of the workshop presents stimulating discussions on the challenges of Assistive Augmentation as examined through case studies These studies focus on two main areas 1 Augmented Sensors and Feedback Modalities and 2 Design for Assistive Augmentation

*UbiComp 2002: Ubiquitous Computing* Gaetano Borriello, Lars E. Holmquist, 2002-09-18 Ubiquitous computing is coming of age In the few short years of the lifetime of this conference we have seen major changes in our emerging research community When the conference started in 1999 as Handheld and Ubiquitous Computing the field was still in its formative stage In 2002 we see the UbiComp conference the name was shortened last year emerging as an established player attracting research submissions of very high quality from all over the world Virtually all major research centers and universities now have research programs broadly in the field of ubiquitous computing Whether we choose to call it ubiquitous pervasive invisible disappearing embodied or some other variant of computing it is clear that Mark Weiser's original vision has only become more and more relevant since the term was coined over 10 years ago But most important in our context the interest in the field can be gauged from the rising number of full paper submissions to the conference from about 70 in both 1999 and 2000 to 90 in 2001 to this year's record breaking 136 Counting technical notes workshops poster and video submissions there were over 250 original works submitted to this year's conference This is an impressive effort by the research community and we are grateful to everyone who took time to submit their work without this the conference would simply not exist

**Introduction to Gender**

Jennifer Marchbank, Gayle Letherby, 2014-06-30 Thoroughly updated in this second edition *Introduction to Gender* offers an interdisciplinary approach to the main themes and debates in gender studies. This comprehensive and contemporary text explores the idea of gender from the perspectives of history, sociology, social policy, anthropology, psychology, politics, pedagogy and geography and considers issues such as health and illness, work, family, crime and violence and culture and media. Throughout the text, studies on masculinity are highlighted alongside essential feminist work, producing an integrated investigation of the field. Key features: A thematic structure provides a clear exploration of each debate without losing sight of the interconnections between disciplines. World in focus boxes and international case studies offer a broad global perspective on gender studies. In text features and student exercises including Controversy: A critical look and Stop and think boxes allow the reader to engage in the debates and revise the material covered. Hotlinks throughout the text make connections between chapters, allowing the reader to follow the path of particular issues and debates between topics and disciplines. New to the second edition: A new chapter explores gender through the discipline of philosophy. A new section on international relations brings this relevant topic into focus. Current discussion on the language of gender across Europe is brought in to Chapter 1. A focus on Europe and Scandinavia as well as the UK gives the text a broader scope. Examples are updated throughout to ensure the text is cutting edge and relevant. *Introduction to Gender* second edition is highly relevant to today's students across the social sciences and is an essential introduction for students of sociology, women's studies and men's studies.

**Building Services Journal**, 2004      **The Furniture Machine** Gareth Williams, 2006-10 When did sofas become so sexy and why? Contemporary furniture design has enjoyed growing international popularity in the last fifteen years. *The Furniture Machine* looks at the major trends and designers of this period, including Philippe Starck, Ron Arad and Marc Newson, to unravel the workings of the furniture industry since 1990. Attention is also given to the innovations of Italian manufacturers such as Cappellini and B B Italia and the increasing influence of conceptual design from the theoretical proposals of Droog Design to the commercial products of Moooi.
