

What is Leap Year?

When you learn about the months of the year, you learn that each month has 30 or 31 days, except February. February usually has 28 days. However, February will have 29 days when it is a leap year. Leap year takes place every four years. On the fourth year, February has a 29th day. This means that during a leap year, there is an extra day on the Gregorian calendar. Instead of having 365 days, a leap year has 366 days. The extra day is always added to February since it is the shortest month of the year.
