that there is a truth within the person linked to the discovery of a deeper more fundamental more authentic self has been a common theme in many religions throughout history and an idea that is still with us today This inwardness or interiority unique to me as an essential feature of who I am has been an aspect of culture and even a defining characteristic of human being an authentic private sphere to which we can retreat that is beyond the conflicts of the outer world This inner world becomes more real than the outer which is seen as but a pale reflection Remarkably the image of the truth within is found across cultures and this book presents an account of this idea in the pre modern history of Christianity Hinduism and Buddhism Furthermore in theistic religions Christianity and some forms of Hinduism the truth within is conflated with the idea of God within and in all cases this inner truth is thought to be not only the heart of the person but also the heart of the universe itself Gavin Flood examines the metaphor of inwardness and the idea of truth within along with the methods developed in religions to attain it such as prayer and meditation These views of inwardness that link the self to cosmology can be contrasted with a modern understanding of the person In examining the truth within in Christianity Hinduism and Buddhism Flood offers a hermeneutical phenomenology of inwardness and a defence of comparative religion *A Guide to Assessments that Work* John Hunsley, Eric J. The Sociogenesis of Language and Human Conduct Bruce Bain,2013-11-11 Michael Cole To the unwary reader even the table of contents of this book will appear incongruous What notion let alone set of principles could bring coherence to the following concepts playing peekaboo with small children aging human alienation conversations with Uzbeki peasants toolmaking sexism the world of the deaf the ecology of hunting groups After she has had a chance to scan the entire set the reader can see that this book seems to center on language But it clearly is not a book about linguistics It is about a notion that combines two other notions that we usually find located in very different kinds of books language and human nature There is no widely accepted term for this combined notion It does not fit into those ways of thinking of the world that have gotten us where we are Walker Percy philosopher novelist succinctly nails the source of our problem The importance of a study of language as opposed to a scientific study of a space time event like a solar eclipse or rat behavior is that as soon as one scratches the surface of the familiar and comes face to face with the nature of language one also finds himself face to face with the nature of man 1975 p 10 Once we reinvent this insight its implications begin to work into our lives our central problem becomes to figure out how to deal with the dilemmas it implies
