Life Finds a Way Andreas Wagner, 2019-06-11 How the principles of biological innovation can help us overcome creative challenges in art business and science In Life Finds a Way biologist Andreas Wagner reveals the deep symmetry between innovation in biological evolution and human cultural creativity Rarely is either a linear climb to perfection instead progress is typically marked by a sequence of peaks plateaus and pitfalls For instance in Picasso's forty some iterations of Guernica we see the same combination of small steps incessant reshuffling and large almost reckless leaps that characterize the way evolution transformed a dinosaur's grasping claw into a condor's soaring wing By understanding these principles we can also better realize our own creative potential to find new solutions to adversity Ultimately Life Finds a Way offers a new framework for

the nature of creativity enabling us to better adapt grow and change in art business or science that is in life *Superminds*
Thomas W. Malone,2018-05-15 From the founding director of the MIT Center for Collective Intelligence comes a fascinating look at the remarkable capacity for intelligence exhibited by groups of people and computers working together If you re like most people you probably believe that humans are the most intelligent animals on our planet But there s another kind of entity that can be far smarter groups of people In this groundbreaking book Thomas Malone the founding director of the MIT Center for Collective Intelligence shows how groups of people working together in superminds like hierarchies markets democracies and communities have been responsible for almost all human achievements in business government science and beyond And these collectively intelligent human groups are about to get much smarter Using dozens of striking examples and case studies Malone shows how computers can help create more intelligent superminds simply by connecting humans to one another in a variety of rich new ways And although it will probably happen more gradually than many people expect artificially intelligent computers will amplify the power of these superminds by doing increasingly complex kinds of thinking Together these changes will have far reaching implications for everything from the way we buy groceries and plan business strategies to how we respond to climate change and even for democracy itself By understanding how these collectively intelligent groups work we can learn how to harness their genius to achieve our human goals Drawing on cutting edge science and insights from a remarkable range of disciplines *Superminds* articulates a bold and utterly fascinating picture of the future that will change the ways you work and live both with other people and with computers Capturing Social and Behavioral Domains and Measures in Electronic Health Records Institute of Medicine,Board on Population Health and Public Health Practice,Committee on the Recommended Social and Behavioral Domains and Measures for Electronic Health Records,2015-01-08 Determinants of health like physical activity levels and living conditions have traditionally been the concern of public health and have not been linked closely to clinical practice However if standardized social and behavioral data can be incorporated into patient electronic health records EHRs those data can provide crucial information about factors that influence health and the effectiveness of treatment Such information is useful for diagnosis treatment choices policy health care system design and innovations to improve health outcomes and reduce health care costs *Capturing Social and Behavioral Domains and Measures in Electronic Health Records* Phase 2 identifies domains and measures that capture the social determinants of health to inform the development of recommendations for the meaningful use of EHRs This report is the second part of a two part study The Phase 1 report identified 17 domains for inclusion in EHRs This report pinpoints 12 measures related to 11 of the initial domains and considers the implications of incorporating them into all EHRs This book includes three chapters from the Phase 1 report in addition to the new Phase 2 material Standardized use of EHRs that include social and behavioral domains could provide better patient care improve population health and enable more informative research The recommendations of *Capturing Social and Behavioral Domains and Measures in Electronic Health*

The Opportunity Equation Eric Schwarz, 2015-08-25

Schwarz founder of the groundbreaking Citizen Schools program shares his vision for reducing inequality by pairing successful adults with low income students Parental wealth now predicts adult success more than at any point in the last hundred years And yet as debates about education rage on and wealth based achievement gaps grow too many people fix the blame on one of two convenient scapegoats poverty or our public schools But in fact low income kids are learning more now than ever before The real culprit for rising inequality Eric Schwarz argues in *The Opportunity Equation* is that wealthier kids are learning much much more mostly outside of school In summer camps robotics competitions sessions with private tutors and conversations around the dinner table children from more affluent families build the skills and social networks that propel them to success In *The Opportunity Equation* Schwarz tells the story of how he founded the pioneering Citizen Schools program to combat rising inequality by bringing these same opportunities to children who don't have access to them By increasing learning time in schools and harnessing the power of an army of volunteers with various skills and professional backgrounds lawyers engineers carpenters journalists nonprofit leaders and grandmothers who sew Citizen Schools offers after school apprenticeships that provide the building blocks for adult success Recounting the triumphs and setbacks he's encountered in implementing the program Schwarz shows that some of the nation's lowest performing schools in its lowest income cities can with help provide their students with many of the same experiences wealthy communities afford to their children The results have been proven in the dozen school districts from New York to Oakland that have partnered with Citizen Schools rates of attendance proficiency graduation and college acceptance have gone up and the achievement gap closes At a time when many stakeholders in the education debates are looking for new silver bullet shortcuts to educational excellence Schwarz shows that the best solution is human centered rooted in the American tradition of citizen voluntarism and most important achievable We can provide quality education for all students and close the opportunity gap in this country and we can do it together

Leave no child behind UNESCO, 2022-06-20 To leave no child behind UNESCO developed the first global report of this scope on boys disengagement from education bringing together qualitative and quantitative evidence from over 140 countries This report provides an overview on the global situation on boys disengagement from and disadvantage in education It identifies factors influencing boys participation progression and learning outcomes in education It also analyses responses by governments and partners and examines promising policies and programmes Finally it includes recommendations on how to engage boys with education and address disadvantage While girls continue to face severe disadvantages and inequalities in education the report shows that boys in many countries are at greater risk than girls of repeating grades failing to complete different education levels and having poorer learning outcomes in school No less than 132 million boys of primary and secondary school age are out of school They urgently require support As this report shows

supporting boys does not mean that girls lose out and vice versa Addressing boys disengagement not only benefits boys learning employment opportunities income and well being it is also highly beneficial for achieving gender equality and desirable economic social and health outcomes
