Natural Capital Peter Kareiva, 2011-04-07 In 2005 The Millennium Ecosystem Assessment MA provided the first global assessment of the world's ecosystems and ecosystem services It concluded that recent trends in ecosystem change threatened human wellbeing due to declining ecosystem services This bleak prophecy has galvanized conservation organizations ecologists and economists to work toward rigorous valuations of ecosystem services at a spatial scale and with a resolution that can inform public policy The editors have assembled the world's leading scientists in the fields of conservation policy analysis and resource economics to provide the most intensive and best technical analyses of ecosystem services to date A key idea that guides the science is that the modelling and valuation approaches being developed should use data that are readily available around the world In addition the book documents a toolbox of ecosystem service mapping modeling and valuation models that both The Nature Conservancy and the World Wide Fund for Nature WWF are beginning to apply around the world as they transform conservation from a biodiversity only to a people and ecosystem services agenda The book addresses land freshwater and marine systems at a variety of spatial scales and includes discussion of how to treat both climate change and cultural values when examining tradeoffs among ecosystem services

Sustainable Fish Farming Helge Reinertsen, Herborg Haaland, 1995-06-01 The aim of the symposium on which this text is based was to discuss the current practices of the fish farming industry and search for sustainable directions for future development Topics covered include resources for fish food in aquaculture genetics and environment and aquaculture interaction

Nature-Based Solutions for agricultural water management and food security Food and Agriculture Organization of the United Nations, 2019-03-14 Accessibility to clean and sufficient water resources for agriculture is key in feeding the steadily increasing world population in a sustainable manner Nature Based Solutions NBS offer a promising contribution to enhance availability and quality of water for productive purposes and human consumption while simultaneously striving to preserve the integrity and intrinsic value of the ecosystems Implementing successful NBS for water management however is not an easy task since many ecosystems are

already severely degraded and exploited beyond their regenerative capacity Furthermore ecosystems are large and complex and the many stakeholders involved may have conflicting interests Hence implementation of NBS requires a structured and comprehensive approach that starts with the valuation of the services provided by the ecosystem The whole set of use and non use values in monetary terms provides a factual basis to guide the implementation of NBS which is ideally based on transdisciplinary principles i e complemented with scientific and case specific knowledge of the ecosystem in an adaptive decision making process that involves the relevant stakeholders This discussion paper evaluated twenty one NBS case studies using a non representative sample to learn from successful and failed experiences and to identify possible causalities among factors that characterize the implementation of NBS The case studies give a minor role to valuation of ecosystem services an area for which the literature is still developing guidance Less successful water management projects tend to suffer from inadequate factual and scientific basis and uncoordinated or insufficient stakeholder involvement and lack of long term planning Successful case studies point to satisfactory understanding of the functioning of ecosystems and importance of multi stakeholder platforms well identified funding schemes realistic monitoring and evaluation systems and endurance of its promoters *Benefit Transfer of Environmental and Resource Values* Robert J. Johnston, John Rolfe, Randall S.

Rosenberger, Roy Brouwer, 2015-06-02 This book provides a comprehensive review of environmental benefit transfer methods issues and challenges covering topics relevant to researchers and practitioners Early chapters provide accessible introductory materials suitable for non economists These chapters also detail how benefit transfer is used within the policy process Later chapters cover more advanced topics suited to valuation researchers graduate students and those with similar knowledge of economic and statistical theory and methods This book provides the most complete coverage of environmental benefit transfer methods available in a single location The book targets a wide audience including undergraduate and graduate students practitioners in economics and other disciplines looking for a one stop handbook covering benefit transfer topics and those who wish to apply or evaluate benefit transfer methods It is designed for those both with and without training in economics **Assessing the Environmental Impact of Textiles and the Clothing Supply Chain**
