In Fraud We Trust Wes Henricksen, 2024-11-15 Telling lies and falling for them is one of the things that makes us human The vast majority of these falsehoods are harmless and perfectly legal But when someone deceives another for material gain or profit inflicting injury in the process we give this kind of lie a special label fraud Most people are familiar with the concept and understand that fraud is prohibited by law What many fail to appreciate however is that the law does not treat all frauds equally If you defraud an individual you might end up in prison On the other hand if you defraud millions of people what Wes Henricksen calls fraud on the public you might end up wealthy or powerful or even get elected president In a perverse sense the bigger the fraud the more likely it is protected by the First Amendment and therefore legal As a result many of the largest and most destructive fraud schemes are allowed encouraged and richly rewarded Examples of fraud on the public are everywhere The fossil fuel industry long used PR firms and lobbyists to spread disinformation about oil's role in climate change Sugar companies misled the public about the dangers of high fructose corn syrup redirecting the public's attention to fat Cigarette manufacturers famously lied about the risks of tobacco and opioid makers lied about the effects of the drug Social media influencers and fringe media outlets promoted false claims about the COVID 19 pandemic being a government hoax Others claimed that vaccines were part of a sinister plot Politicians on both sides of the aisle lie with such regularity that people have become deeply cynical about whether to believe anything they say Henricksen shows that large scale fraud is carried out for many reasons beyond financial profit including political gain the prevention of justice and the falsification of history In addition to exposing the depths of the problem Henricksen gives readers a way forward He proposes we call these massive deceit campaigns by their proper name that we de weaponize the First Amendment which was never meant to shield swindlers and that we enact new laws that protect the public from fraud By revealing for the first time the root legal cause of the misinformation crisis and presenting novel solutions *In Fraud We Trust* speaks to the present moment as it offers answers for the future

Currencies and Cultures Noel Mark Noël, 2019-02-18 Why cultures are different can be examined through the multifaceted lens of their currencies their economic policies and the very foundations of how money works Anyone who has traveled abroad immediately senses the cultural differences even before learning about the language politics or history of the people The tourist is promptly faced with strangely priced goods and services an unknown currency of dubious value and an alien system of payment trade and exchange An investigation into the origins and

evolution of money explains much about the behavior of people and their culture The collection of coins and money often begins with an inquiry into the history of a currency and other payment media used to resolve debts and exchange goods Coin collecting can lead to a compelling interest in the study of cultural differences as numismatists have come to appreciate the semantic connection between numisma coinage and nomos customs with nonos laws Those interested in economics and business would find through the study of numismatics a wealth of information the equivalent of a life long education not only in the study of coins and currencies but also about people and their history Culture is defined by the values norms and beliefs shared among its members and supported by its cultural institutions A symbiotic relationship exists between a currency and its culture and society The extent to which cultural institutions encourage and reinforce their economic foundations indicates the degree of a culture s success or failure This book offers insights into how cultural institutions can strengthen their citizens values and beliefs with that of their currency and enhance the process of trade and exchange for the betterment and prosperity of its people The Latin phrase cui bono translates into to whose profit or advantage Currencies and Cultures reexamines and challenges our current understanding of economic history and provides insights into human behavior by following the money *Understanding and Applying Medical Anthropology* Peter J. Brown,Svea Closser,2016-07 The editors of the third edition of the seminal textbook *Understanding and Applying Medical Anthropology* bring it completely up to date for both instructors and students The collection of 49 readings 17 of them new to this edition offers extensive background description and exposes students to the breadth of theoretical methodological and practical perspectives and issues in the field of medical anthropology The text provides specific examples and case studies of research as it is applied to a range of health settings from cross cultural clinical encounters to cultural analysis of new biomedical technologies and the implementation of programs in global health settings The new edition features a major revision that eliminates many older readings in favor of more fresh relevant selections a new section on structural violence that looks at the impact of poverty and other forms of social marginalization on health an updated and expanded section on Conceptual Tools including new research and ideas that are currently driving the field of medical anthropology forward such as epigenetics and syndemics new chapters on climate change Ebola PTSD among Iraq Afghanistan veterans eating disorders and autism among others recent articles from Margaret Mead Award winners Sera Young Seth Holmes and Erin Finley along with new articles by such established medical anthropologists as Paul Farmer and Merrill Singer **The Essence of Anthropology** ,2010

Phenomenology and the Horizon of Experience Joseph Rivera, 2021-12-30 This book explores the threshold between phenomenology and lived religion in dialogue with three French luminaries Michel Henry Jean Luc Marion and Jean Yves Lacoste Through close reading and critical analysis each chapter touches on how a liturgical and ritual setting or a spiritual vision of the body can shape and ultimately structure the experience of an individual's surrounding world The volume advances debate about the scope and limits of the phenomenological analysis of religious themes and disturbs the assumption that theology and phenomenology are incapable of constructive interdisciplinary dialogue **Universal Localities** Galin Tihanov, 2022-07-02 The volume features the work of leading scholars from the US UK Germany China Spain and Russia and presents an important contribution to current debates on world literature The contributions discuss various facets of the historically changing role and status of language in the construction of notions of universality and locality of difference foreignness and openness they explore the relationship between world literature and bilingualism supranational languages dialects and linguistic inbetweenness They also examine the larger social and political stakes behind both foundational and more recent attempts to articulate ideas of world literature Mapping the space between philology anthropology and ecohumanities the essays in this volume approach world literature with sophisticated methodological toolkits and open up new opportunities for engaging with this important discursive framework **Ecological**

Entanglements in the Anthropocene Nicholas Holm, Sy Taffel, 2016-12-21 This edited collection explores the relationships between humans and nature at a time when the traditional sense of separation between human cultures and a natural wilderness is being eroded The Anthropocene whose literal translation is the Age of Man is one way of marking these planetary changes to the Earth system Global climate change and rising sea levels are two prominent examples of how nature can no longer be simply thought of as something outside and removed from humans and vice versa This collection applies the concepts of ecology and entanglement to address pressing political social and cultural issues surrounding human relationships with the nonhuman world in terms of working with nature It asks are there more or less preferable ways of working with nature What forms and practices might this work take and how do we distinguish between them Is the idea of nature even sufficient to approach such questions or do we need to reconsider using the term nature in favour of terms such as environments ecologies or the broad notion of the non human world How might we forge perspectives and enact practices which build resilience and community across species and spaces constructing relationships with nonhumans which go beyond discourses of pollution degradation and destruction Bringing together a range of contributors from across multiple academic

disciplines activists and artists this book examines how these questions might help us understand and assess the different ways in which humans transform engage and interact with the nonhuman world **Cultural Fault Lines in Healthcare**

Michael C. Brannigan,2012-01-01 An invaluable work especially for professionals and students in health care bioethics humanities cultural studies and for the educated lay reader this volume offers a critical reflection on cultural competence and awareness in health care an arena where world views and values often collide *White Lies* Christopher M.

Driscoll,2015-10-23 *White Lies* considers African American bodies as the site of cultural debates over a contested white religion in the United States Rooting his analysis in the work of W E B DuBois and James Baldwin Christopher Driscoll traces the shifting definitions of white religion from the nineteenth century up to the death of Michael Brown and other racial controversies of the present day He engages both modern philosophers and popular imagery to isolate the instabilities central to a white religion including the inadequacy of this framing concept as a way of describing and processing death The book will be of interest to students and scholars interested in African American Religion philosophy and race and Whiteness Studies *Leininger's Culture Care Diversity and Universality* Marilyn R. McFarland,Hiba B. Wehbe-Alamah,2015 Preceded
