Ge Ie33 Manual:

Manual of 3D Echocardiography Eduardo Casas Rojo, Covadonga Fernandez-Golfin, José Luis Zamorano, 2017-03-15
This book is a practical guiding manual to explain critical clinical practice in three dimensional 3D echocardiography. The use of this technology has been limited to certain pioneer imaging units but with the advent of lower cost hardware it is spreading and reaching more users that will start to use it often without previous experience or formal academic training. This title provides these readers with a full review of the features, clinical indications and methodological aspects of 3D echo in a practical how to do it way. 3D echocardiography techniques are becoming more diverse as they are applied to transthoracic and transesophageal studies. 3D wall motion tracking, fusion of echocardiographic and fluoroscopy navigation, fusion of wall motion tracking and coronary tomography. All these aspects are described and explained deeply in this book.

Manual of Cardio-oncology Chiara Lestuzzi, Stefano Oliva, Francesco Ferrà, 2017-10-13. This concise and handy manual provides straightforward up to date guidance for cardiologists and other practitioners on the management of cancer patients with cardiac problems whether they be due to the cancer itself or to antineoplastic treatment. Detailed attention is devoted to the various forms of cardiotoxicity associated with chemotherapy and radiotherapy. The drugs commonly responsible for each toxicity are identified and clear advice is offered on monitoring techniques and treatment approaches. In addition the issue of cardiotoxicity due to cancer treatment in particular patient groups: children, the elderly and those with pre existing cardiac disease is addressed separately with guidance on when and how antineoplastic and/or cardiological treatments should be modified. Further sections describe the correct responses to cardiac problems secondary to the cancer itself including thromboembolic disorders and electrolyte imbalances and the diagnosis, treatment and follow up of cardiac tumors. A closing section considers how to improve cooperation between oncologists, cardiologists and general practitioners to ensure that cancer patients' cardiovascular needs are met in a multidisciplinary approach. **Herzkatheter-Manual** Raimund Erbel, 2012.
