

Threading for twin needle

1. Insert a twin needle. See page 16 "Changing the needle".
2. Use a second thread spool or wind a bobbin with the thread you are going to use as the second upper thread.
3. Left needle (blue). Thread the machine as explained on page 9 (Vertical spool pin) and check to ensure that thread lies between the **inner** thread tension discs, **inside** the last thread guide. Thread left needle.
4. Right needle (red). Pull up the extra spool pin.
5. Place a spool holder and a felt pad under the bobbin with the second thread on the spool pin.
6. Thread the machine as before but this thread should lie between the **outer** thread tension discs, **outside** the last thread guide. Thread right needle.

Bobbin winding with the machine threaded

Make sure that the presser foot and the needle are in the up position. Use only the original Husqvarna Viking green bobbins with your Designer I.

Only use a metal presser foot when bobbin winding from the needle.

1. Place your empty bobbin with the small mark (B) out on the bobbin spindle on the front of the machine. Bring the bobbin spindle down. A Pop-up menu on the Color Touch Screen reminds you that bobbin winding is engaged.
2. Pull the thread from the needle under the presser foot and to the right under the thread guide (c) and over (d).
3. Start from above and wind a few turns of thread clockwise around the bobbin. Cut off the thread on the thread cutter (e).
4. Press the foot control or touch (F). When the bobbin is filled, the winding will stop automatically. Remove the bobbin, cut off the thread (e) and bring the bobbin spindle up.

Notes: We do not recommend winding specialty threads such as invisible or other stretchy threads through the needle. Instead see "Bobbin winding – vertical spool pin".
