Literature Research On Rhinoceros South Africa:

The Literary Gazette and Journal of the Belles Lettres, Arts, Sciences, &c, 1838 Conserving Africa's Mega-Diversity in the Anthropocene Joris P. G. M. Cromsigt, Sally Archibald, Norman Owen-Smith, 2017-03-02 This book synthesises key insights from a century of ecological research and monitoring efforts in one of Africa's oldest protected areas **Africa's Threatened Rhinos** Keith Somerville, 2025-01-14 Africa's surviving rhinos are under serious threat. Poaching for their horns, massive extermination by sports hunters in the nineteenth and first half of the twentieth century and progressive habitat loss have all driven black and white rhino close to the edge. This book considers human interactions with these magnificent and enigmatic animals, charting hunting for food and hides and then hunting for horn to meet external demand for this much coveted commodity as well as peaceful coexistence over the course of three millennia. With only two females alive in a closely protected reserve in Kenya, the Northern White Rhino is on the brink of extinction. The Southern White Rhino was increasing in numbers but poaching in South Africa, Botswana and Namibia has now reduced the population to fewer than 20,000 while Black Rhino are hovering around the 6,000-6,500 mark, also with the danger of extirpation everywhere but in parts of eastern and southern Africa. Many books have been written on poaching and the decline of the rhino, often from a very personal, engaged viewpoint. This volume takes the reader into important new territory, showing how human agency has led to the situation we now face. Covering the history of commercial and sporting exploitation of rhino, it brings the picture up to date with an overview of contemporary conservation and anti-poaching operations. This urgent work is a significant contribution to our understanding of wildlife on the African continent **Situational Prevention of Poaching** Andrew Lemieux, 2014-03-05 For centuries criminologists have looked for scientific ways to study, understand and ultimately prevent crime. In this volume, a unique offense, poaching, is explored in various contexts to determine what opportunity structures favor this crime and how situational crime prevention may reduce its prevalence. The data sources used range from publically available secondary data about animal populations to interviews with hunters to actual law enforcement data collected inside protected areas. Various methods are utilized to look for patterns in poaching behaviour regarding where poachers strike, which species they target and their modus operandi. Collectively, the volume shows that principles of criminal opportunity theory and situational crime prevention are useful for studying and preventing poaching in a variety of contexts. The methods employed by each chapter are easily replicated and meant to stimulate empirical poaching research where data is available. While the theoretical grounding of this volume is drawn from criminology, it is written for a broad audience of academics, practitioners and those interested in wildlife conservation *Rhinos of the World* Mario Melletti, Bibhab Talukdar, David Balfour, 2025-02-20 This book represents the culmination of more than four years of work by many rhino experts, primarily from Africa, Asia, the United States and Europe, involved in rhino conservation research and management.
