**John Keats and the Ideas of the Enlightenment** Porscha Fermanis, 2009-09-23 John Keats is generally considered to be the least intellectually sophisticated of all the major Romantic poets but he was a more serious thinker than either his contemporaries or later scholars have acknowledged This book provides a major reassessment of Keats's intellectual life by considering his engagement with a formidable body of eighteenth century thought from the work of Voltaire Robertson and Gibbon to Hutcheson Hume and Smith The book re-examines some of Keats's most important poems including The Eve of St Agnes Hyperion Lamia and Ode to Psyche in the light of a range of Enlightenment ideas and contexts from literary history and cultural progress to anthropology political economy and moral philosophy By demonstrating that the language and ideas of the Enlightenment played a key role in establishing his poetic agenda Keats's poetry is shown to be less the expression of an intuitive young genius than the product of the cultural and intellectual contexts of his time

thinker who shaped our century     *John Calvin's Ideas* Paul Helm,2004-11-11 This is a major study of the theological thought of John Calvin which examines his central theological ideas through a philosophical lens looking at issues in Metaphysics Epistemology and Ethics The study the first of its kind is concerned with how Calvin actually uses philosophical ideas in his work as a theologian and biblical commentator The book also includes a careful examination of those ideas of Calvin to which the Reformed Epistemologists appeal to find grounds and precedent for their development of Reformed Epistemology notably the *sensus divinitatis* and the internal testimony of the Holy Spirit     **Exchange of Ideas** Adam R. Nelson,2023-12-05 The first volume of an ambitious new economic history of American higher education *Exchange of Ideas* launches a breathtakingly ambitious new economic history of American higher education In this volume Adam R Nelson focuses on the early republic explaining how knowledge itself became a commodity as useful ideas became salable goods and American colleges were drawn into transatlantic commercial relations American scholars might once have imagined that higher education could sit beyond the sphere of market activity that intellectual exchange could transcend vulgar consumerism but already by the end of the eighteenth century they saw how ideas could be factored into the nation s balance of trade Moreover they concluded that it was the function of colleges to oversee the complex process whereby knowledge could be priced and purchased The history of capitalism and the history of higher education Nelson reveals are intimately intertwined which raises a host of important and strikingly urgent questions How do we understand knowledge and education as commercial goods Who should pay for them And fundamentally what is the optimal system of higher education in a capitalist democracy     *John Banville's Narcissistic Fictions* M. O'Connell,2013-09-20 In reading Banville s novels through the work of key psychoanalytical theorists John Banville s *Narcissistic Fictions* brings together apparently disparate thematic strands missing twins shame false identities and presents these as manifestations of a central concern with narcissism     *John Dewey and the Notion of Trans-action* Christian Morgner,2019-10-09 Engaging with several emerging and interconnected approaches in the social sciences including pragmatism system theory processual thinking and relational thinking this book leverages John Dewey and Arthur Bentley s often misunderstood concept of trans action to revisit and redefine our perceptions of social relations and social life The contributors gathered here use trans action in a more specific sense showing why and how social scientists and philosophers might use the concept to better understand our social life and social problems As the first collective sociological attempt to apply the concept of trans action to contemporary social issues this volume is a key reference for the growing audience of relational and processual thinkers in the social sciences and beyond     *War in Social Thought* Hans Joas,Wolfgang Knöbl,2013 While focusing on social thought this book draws on many disciplines including philosophy anthropology and political science It demonstrates the profound difficulties social thinkers including liberals socialists and those intellectuals who could be regarded as the sociologists had in coming to terms with the phenomenon of war     **The Wealth of Ideas** Alessandro Roncaglia,2006-11-30 The *Wealth of Ideas* first published in 2005

traces the history of economic thought from its prehistory the Bible Classical antiquity to the present day In this eloquently written scientifically rigorous and well documented book chapters on William Petty Adam Smith David Ricardo Karl Marx William Stanley Jevons Carl Menger L on Walras Alfred Marshall John Maynard Keynes Joseph Schumpeter and Piero Sraffa alternate with chapters on other important figures and on debates of the period Economic thought is seen as developing between two opposite poles a subjective one based on the ideas of scarcity and utility and an objective one based on the notions of physical costs and surplus Professor Roncaglia focuses on the different views of the economy and society and on their evolution over time and critically evaluates the foundations of the scarcity utility approach in comparison with the Classical Keynesian approach
