**Leading Responsibly in the Asian Century** Mario Fernando, 2015-12-15 The book is one of the first to focus on responsible leadership in the contemporary Asian century context It adopts a unique context driven social innovation based responsible leadership approach to explain how context can impact and shape the theory and practice of responsible leadership This unique work will strongly appeal to a broad spectrum of researchers and scholars across disciplines with a particular interest in the interplay between leadership responsibility and ethics As Asia's influence on the global economy continues to grow in the Asian Century this book offers a culturally integrated view of how the shift in economic power to Asia and the rising new global economic order can influence the theory and practice of responsible leadership The book focuses particularly on the Asian century opportunities and challenges as a strong contextual factor that shapes the responsibility of responsible leadership The scholarly literature on the topic the case studies developed through interviews and secondary data and author's corporate experiences in the Asia

Pacific region in leading organisations are key sources for the book's assertions. It fills an important gap in the literature on how Asian cultural factors might influence the predominantly Western developed responsible leadership theory and practice. This book covers key topics including the moral basis for responsibility theory and practice of responsible leadership, Asian challenges to responsible leadership and socially innovative responsible leadership. Fernando's book provides a fresh and novel perspective on how evolutionary changes in economic power between Asia and the rest of the world undoubtedly will affect the practice of responsible leadership. He examines varying views on responsible leadership across cultures, demonstrating how Asian and Western leadership styles have evolved as our economy continues to become more globally integrated. Prof Laura Pincus Hartman, Director Susilo Institute for Ethics in the Global Economy, Boston University Questrom School of Business, Boston, USA. There is little doubt that this is the Asian Century and that economic and political influences from the east will increase. But so too may cultural, ethical and even religious influences. It is therefore important that researchers understand these significant changes. In this book, Mario Fernando gives us an insight into what this means for responsible leadership. It is primarily an excellent work of scholarship written for academics who teach and research in this area by someone who knows Asian business and culture from the inside. But it will also reward careful study by practicing leaders and those who are the potential leaders of the future. Professor of Business Ethics, Geoff Moore, Durham Business School, Durham University, UK.

*Will the Internet Fragment?* Milton Mueller, 2017-05-23. The Internet has united the world as never before. But is it in danger of breaking apart? Cybersecurity, geopolitical tensions and calls for data sovereignty have made many believe that the Internet is fragmenting. In this incisive new book, Milton Mueller argues that the fragmentation diagnosis misses the mark. The rhetoric of fragmentation camouflages the real issue: the attempt by governments to align information flows with their jurisdictional boundaries. The fragmentation debate is really a power struggle over the future of national sovereignty. It pits global governance and open access against the traditional territorial institutions of government. This conflict, the book argues, can only be resolved through radical institutional innovations. *Will the Internet Fragment* is essential reading for students and scholars of media and communications, international relations, political science and STS, as well as anyone concerned about the quality of Internet governance.

**Driving Innovation from Within** Kaihan Krippendorff, 2019-10-22. Conventional business wisdom tells us that entrepreneurs are society's main source of innovation. Young founders leave college with a big idea, get to work in a garage and build something that changes the world. Typical corporate employees, strangled by slow-moving bureaucracy, are blocked from making transformative discoveries. In *Driving Innovation from Within*, strategist and advisor Kaihan Krippendorff disproves one of today's biggest business myths to highlight lessons for innovators and leaders. He reveals how many of the modern world's most impactful creations were invented by passionate employee innovators. If it were left up to go-it-alone entrepreneurs, we would not have mobile phones, personal computers or e-mail. Distilling more than 150 interviews with internal innovators and leading experts along with

insights from the latest research and today's most successful companies from Tencent and Amazon to Mastercard and Starbucks Krippendorff lays out a step by step playbook to unlock innovation from the inside He maps the barriers that frustrate efforts to disrupt from within and provides tools to remove them detailing how visionary leaders can create islands of freedom inside an organization to activate existing employees potential and beat startups at their own game Driving Innovation from Within is a practical and inspiring guide to leadership from all levels for those who want the fulfillment of changing the world without leaving their job in order to do it
