changed dramatically over the last three decades. Traditionally, pursuit of a doctoral or research credential involved intense study at a large traditional research university and was reserved for those seeking careers in academia or research. The process of completing doctoral level work at traditional universities usually required a commitment to full time study, varied tremendously between institutions and was often somewhat mysterious. Today, all this has changed. The emergence and growth of online education has led to a proliferation of doctoral learning possibilities for busy professionals. Individuals in the industry, nonprofit, and education sectors are pursuing doctoral study as a means to advance their careers, increase their market value in the workplace, and establish their professional stature. If this sounds like you, then you have come to the right place. *Recipes for Success* is the book that will launch you on a successful quest for the doctoral degree. Dissertations are very personal endeavors and accomplishments originating with problems and issues that are meaningful and important to the doctoral learner. These professionals are deeply grounded in their understanding of the issues and needs of their profession. *Recipes* build on this understanding, helping learners to discover and frame issues they are passionate about and construct a credible and influential research study around this passion. While most dissertation guides focus largely or exclusively on the mechanics of writing and organization, *Recipes* approaches dissertation development as an iterative process of thinking and self-reflection that leads learners to discover what matters most to them and to their professions and enables them to frame this meaning into a research problem and purpose and to organize and execute a study design to fit and thus solve the problem and achieve the purpose. From the very beginning of your doctoral journey to the ultimate achievement of degree completion, this book is your guide to the process and content of dissertation and research creation. In *Recipes for Success*, we articulate a process by which you can build the pieces of a successful and influential dissertation. Using a workbook approach rich in tools, templates, frameworks, examples, web integration, and hard-won lessons from experience, *Recipes* provides a friendly, easy-to-navigate process for crafting issues and ideas into research and results. Based on our 40 years of collective experience in the online educational setting, mentoring over 300 professional learners to success in completing their doctorates, including numerous award winners, we identify the most important factors for success and the traps to avoid. Whether you are considering doctoral study, are already in a doctoral program, or are working to develop and complete your dissertation, you will find *Recipes for Success* a key ingredient in your success as a doctoral learner.
