*Sustainability Transformations Across Societies* Björn-Ola Linnér, Victoria Wibeck, 2019-10-03 A comparison of how societal actors in different geographical political and cultural contexts understand agents and drivers of sustainability transformations    [The segregated city: A Nordic overview](#) Moa Tunström, Shinan Wang, 2019-03-28 Issues related to segregation and integration are major responsibilities and challenges for cities and a segregated urban environment can be understood as a symptom of wider social injustices In this brief overview of current research on residential segregation the focus is on structural reasons to segregation This means that it is planning policies and tendencies in socio economic development that are discussed rather than specific social integration measures and projects But there is an obvious arena where these two approaches to segregation meet and that is in the local community and its spaces for social interaction This is important to keep in mind that the integrated city is both a result of strategies and initiatives on a micro scale in the neighbourhood and between individuals and initiatives and development on a macro scale This report is part of a theme on segregation within the Nordic collaboration programme for effective integration and inclusion of refugees and immigrants in the Nordic countries Read more at [www.integrationnorden.org](http://www.integrationnorden.org)

**Rockefeller** Jacob Nordangård, 2024-04-02 Why would the first family of oil so ardently support environmental climate research and activism Join author and researcher Jacob Nordangård as he uncovers the whole sordid truth The Rockefeller family is one of the richest in the world Yet why would the family that made the world dependent on oil fund environmental and climate research since the 1950s help shape climate policy measures since the 1980s and supported climate activism since the 1990s Rockefeller Controlling the Game is the thrilling and paradoxical story of one of the world's most influential global players Through its top position in American business close contacts with the White House and with their immense financial power as one of the world's leading private research funders the Rockefellers have been able to anchor the climate issue both scientifically and politically Yet what is the reasoning behind doing so Author and researcher Jacob Nordangård follows the family from the founding of Standard Oil and the Rockefeller Foundation up through the aftermath of the Paris Agreement with the declaration of the Fourth Industrial Revolution in January 2016 to the present day Nordangård's in depth research includes the large quantities of new material recently made available on the Internet as well as the Rockefeller Foundation's own annual reports Nordangård's main focus is the Rockefeller family's involvement in climate research and politics but the actions and motives of some of their allies are also explored as well as the family's influence on the development of modern medicine family planning agriculture art architecture behavioral science information technology and politics The Rockefeller family's utopian dream of a perfect world will have serious consequences for the survival of the human species and life as we know it The Rockefeller Foundation's stated mission to promote the well being of humanity throughout the world has a dark flipside as Nordangård will prove the

Rockefeller family's long standing battle against climate change contains elements of sophisticated propaganda techniques futurism and New Age philosophy aiming at a complete transformation of the whole earth system including economy ecology culture and even humanity itself [Handbook of BRICS and Emerging Economies](#) PB Anand,Shailaja Fennell,Flavio Comim,2020-12-16

Ever since Jim O'Neill at Goldman Sachs coined the term BRICS in 2001 there have been many different assessments of these major emerging economies with some even proclaiming that the promise of the BRICS comprising Brazil Russia India China and South Africa is over. However the so called arranged marriage still seems to be working well with the club having become a formal international forum with summit declarations ministerial meetings and numerous BRICS wide fora. Is this euphoria misplaced? Is there a BRICS model of economic and human development? Are inequalities increasing and is this the denouncement of the economic successes? Are geo political tensions rising between these nations? During the post COVID 19 situation the importance of bilateral and multilateral co operation mechanisms and institutions is becoming clear. This book focuses on one such emerging co operation mechanism of BRICS but also more widely on those five countries and other similar economies. As a global depression looms large global economic recovery depends on the performance of not only its largest economies but also many other important and significant economies within the so called G20 group. Even prior to the COVID 19 outbreak multilateral institutions have been under considerable strain as with the relationship between the United States of America and China and risks to global economic recovery appear very real. This book brings together multi disciplinary perspectives from over sixty scholars and it presents a comprehensive and deep dive into the BRICS and emerging economies and into an understanding the political economic and social contexts that can help in designing approaches for recovery and regaining the last momentum in the journey towards the Sustainable Development Goals.
