Most professionals know that attention to detail is important but hundreds of apps fail to incorporate even the most basic design principles This lack of attention is not merely an aesthetic issue which is important it also affects the way apps function For example a news article without proper alignment will be difficult to read and a poorly rendered icon will be challenging to interpret Apps with a razor sharp attention to detail will stand out because their apps will look good and perform well Part IV Refining your App Concept will show you how to make to your app shine from visual design and branding to accessibility and localization Mastering these three areas will help set your app apart from the crowd You may not have an award winning app over night But knowing your users iterative design and attention to detail are important first steps
