

6. TOWING

1) Loading vehicle onto dolly or flat-bed truck

CAUTION:

- Transport vehicle using a dolly or flat-bed truck whenever possible.
- Move shift lever to "1st" position and apply parking brake.
- When you unload a vehicle from a flat-bed truck, do as follows:
 - run the engine of the unloaded vehicle,
 - shift into reverse gear when unloading the vehicle as it faces the same direction as that in which the truck travels,
 - shift into 1st gear when unloading the vehicle as it faces the opposite direction to that in which the truck travels.

2) Towing with a rope

CAUTION:

- Use a rope only when power train and all wheels are operating properly.
- The ignition switch should be in the "ACC" position. Never have the ignition switch on "LOCK" while the vehicle is being towed because steering will not be possible, since the direction of the wheels will be locked.
- Put the transmission in neutral.
- Never use the tie down hooks for towing.
- Remember that brake booster and power steering will not work when engine is "OFF". You will have to use greater effort for the brake pedal and steering wheel.
- Before towing, check transmission oil and differential oil levels and top up to the specified level if necessary.

3) Towing with front or rear wheels raised

CAUTION:

- Do not tow vehicle with only front or rear wheels placed on towing dolly or flat-bed truck. This may degrade viscous coupling performance or cause vehicle to jump off dolly or truck.

- Do not tow vehicle with rear wheels raised under any circumstances since this will damage bumper.
