

Advanced Transport Phenomena Load Solution Manual

18. From 1975, increasing levels of industrial effluents, transported predominantly from industrialised towns, have been shown to greatly complicate the assessment of the effects of acid rain on ecosystems. Some serious problems resulted. At present the debate focuses on the relative rates of pH, and heavy metals, becoming available due to the increased frequency of these heavy metal inputs to the ecosystem and the effects of acid rain.

This study was not designed to explore binary health outcomes, although important questions and answers emerged that have not been addressed before. It is also important that we do not simply define good recovery as recovery. There are several important phenomena and important questions at issue in the current landscape that have not been addressed, and we are excited to address additional questions.
