Cross-Government: Managing the Risks of Legacy ICT to Public Service Delivery - HC 539 Great Britain: National Audit Office, 2013-09-11 Older ICT systems that are critical for the delivery of key public services legacy ICT expose departments to risks which must be understood and managed A particular risk is that departments dependent on legacy ICT will find it more challenging to achieve the business transformation envisaged by the Government in its digital strategy Some 480 billion of the government's operating revenues and at least 210 billion of non staff expenditure such as pensions and entitlements are reliant to some extent on legacy ICT Good practice in managing legacy ICT as an integrated part of public service delivery is therefore crucial to maintaining the performance of these services The reliance of government on legacy ICT is highlighted by the NAO in a number of case studies The common risks seen by the NAO in its case studies include a higher vulnerability of legacy ICT to security problems being locked in to uncompetitive support arrangements with a single supplier a shortage of skills to maintain and support legacy ICT the proliferation of manual processes as legacy ICT systems have to cope with changing business needs the cost of new business processes to compensate for missing functionality in the legacy ICT system and increased complexity caused by additional interfaces with other systems driving up costs     Legacy ,1995     The Bureau of Reclamation's Architectural Legacy Christine Pfaff, 2007     *Subaru Legacy & Forester 2000 Through 2006* Haynes Editorial Staff, Robert Maddox, John Harold Haynes, 2007-02-01 Haynes manuals are written specifically for the do it yourselfer yet are complete enough to be used by professional mechanics Since 1960 Haynes has produced manuals written from hands on experience based on a vehicle teardown with hundreds of photos and illustrations making Haynes the world leader in automotive repair information     **The Olympic Legacy** Alan Tomlinson, 2017-10-02 This comprehensive collection provides an overview of social scientific perspectives on Olympic legacy using specialist analyses and selected cases to illuminate the recurring anthropological political and sociological dimensions of the legacy debate Drawing upon research conducted on the Beijing Vancouver Athens London and Rio de Janeiro Olympic Games it identifies the recurrent rhetoric that has characterised the legacy debate alongside the harsh realities that contradict many legacies and aspirations Fifteen researchers from six countries contribute a range of critical analytical studies which explore macro perspectives on the shifting political economy symbolized at Beijing or in an over reaching Greece the soft power benefits perceived by the Rio 2016 organizers the anthropological study of neighbourhood spaces threatened by corporate branding and the apparatus of

Bowman,2006 This photographic journal chronicles the history and construction of the high Sierra check dams from the first one at Yellowhammer Lake in 1920 through the last one constructed at High Emigrant Lake in 1951 past the establishment of the Emigrant Wilderness in 1975 and through various stages of support and opposition which are on going to this day Each major period in either check dam construction or the period after is divided into separate chapters with each check dam described in detail with historical and recent photographs many that have never

been published In addition available historical writings and records of Fred Leighton and others were utilized to provide a more in depth perspective on the check dams from those directly involved in construction and or maintenance Outdoor enthusiasts discovering the Emigrant Wilderness of the high Sierra for the first time might easily consider it a pristine wilderness rich in wildlife streams lakes and scenic views And yet this is one area where the hand of man has worked to enrich the natural landscape One of the most notable changes man has made in this area is the construction of small rock dams at the outlet of selected lakes and meadows These dams were called check dams by Fred W Leighton who developed the concept of raising the water level of natural lakes and meadows for fishery and riparian enhancement These check dams provide an enhanced habitat for mountain fish by providing additional water flow in the late summer months when natural streams typically run very low or completely dry
