Hunting With The Bow And Arrow - Legacy Edition Saxton Pope, 2020-02-06 This deluxe unabridged reprint Legacy Edition of Saxton Pope's historic *Hunting With The Bow And Arrow* is full of classic tips and methods for making and using your very own archery equipment from long bows and recurve bows to arrows and arrowheads of all types *The Archer's Manual, Or, The Art of Shooting with the Long Bow* United Bowmen of Philadelphia, 1830 **Traditional Bowyer's Handbook** Clay C. Hayes, 2017-11-11 I can't really explain my attraction to the bow and arrow I can't explain the pull of a camp fire either or the ocean or the open hills where you can see forever It's just there These things are in all of us I think some vestige of our primitive past buried so deep in our genome as to be inseparable from what it is to be human What we think of as civilization is a new experiment in the eyes of Father Time Experts say that humans have been around for some fifty thousand years We've been carrying the bow for maybe five thousand atlatls and spears before that and pushing the plow for maybe two thousand We have been hunters forever We are built to run to pursue big game on the open savannas to kill and eat them With the dwindling of the Pleistocene mega fauna mammoths and such the bow became more important and indeed helped to make us who we are today It still holds that attraction same as the hearth When I was a kid I would make crude bows from green plum branches big at one end and small at the other A discarded hay string would serve as a bowstring My arrows were fat and unfletched and would scarcely fly more than a few yards usually tumbling over in midair The small creatures around our home were plenty safe When I was about 12 or so my brother brought me two old Ben Person recurves he'd found at a yard sale One was a short bow probably no more than 48 inches and the other was more of a standard size They both drew about 50 lbs if I recall That fall happened to be a good year for cottontails around our little farm and I spent countless hours walking the fields and shooting at them as they busted from underfoot Although I'd get several shots a day I never did hit one on the fly but I remember that fall fondly nonetheless The pleasure of jumping rabbits and seeing the feathered shaft streaking toward them was a thrill I've never forgotten I made my first real bow when I was in high school after getting a copy of the Traditional Bowyers Bible in the mail more on this in a moment My first bow a decrowned mulberry flatbow broke within about 10 shots The second held together quite well and is probably still around somewhere and capable of shooting an arrow though it would probably draw about 70lbs When I first started making bows I used the woods I had close at hand mulberry common persimmon red maple white cedar etc I'd probably made more than a dozen bows of various woods before I ever saw a piece of Osage People often ask me where they can find a bow stave and invariably I tell them to use what they have close by No matter where you live you'll have something near that will make a bow Go cut it down and get started This book is an attempt to share some of what I've learned over my years of bow making The Traditional Bowyers Bible series as mentioned earlier is still a great source of information Why write another book on making wood bows you might ask The simple answer is that there are so many ways of doing and explaining things There are

still unanswered questions and we'll cover many of them here. We will cover all of the most frequently asked questions and lay out a simple plan that should guide you through the entire process from finding a stave to stringing your bow and shooting your first arrow. Some of what you'll find here you'll find nowhere else. *The Archer's Manual, Or the Art of Shooting With the Long Bow, as Practised by the United Bowmen of Philadelphia (Classic Reprint)* United Bowmen of Philadelphia, 2018-03-23. Excerpt from *The Archer's Manual or the Art of Shooting With the Long Bow as Practised by the United Bowmen of Philadelphia*. The natives of Brazil when discovered by the Portuguese used bows of an ell in length and of such power that their arrows which were armed with fish bones would pierce the hardest boards. The Indians residing west of the Mississippi as we learn from a member of our club who is entirely familiar with their habits use bows made of the yellow or bow wood *Ma elura aurantiaca* of Nuttall. This wood grows only on the Red river and the southern tributaries of the Arkansas whence it is carried to all the nations residing on the tributaries of the Mississippi.
