[Practical Guide to Visualizing Medicine](#)

Kenneth Wong, Shernaz Walton, Simi Sudhakaran, John Cookson, 2023-07-25 This book provides a practically orientated resource that details the use of a range of imaging techniques across major specialties plus those that are less well represented in standard textbooks e.g. cardiothoracic surgery palliative care geriatric medicine skin conditions from diverse ethnic groups. Emphasis is placed on enabling the reader to interpret images and clinical data while avoiding mistakes and pitfalls in their day to day practice. Detailed question and answer sections along with insightful videos reinforce key messages e.g. visualizing heart murmurs. Grading of questions aids navigation with more difficult questions to benefit the high flying students junior doctors preparing for postgraduate exams physician associates and advanced nurse practitioners working in a specialist area.

**Practical Guide to Visualizing Medicine: A Self Assessment Manual** concisely covers how to use imaging techniques in medicine surgery pediatrics obstetrics and gynecology. It emphasizes the value of being able to accurately visualize signs and symptoms to make accurate diagnoses and provide patient centered care. The added insight given from experienced medical educators on how to select an appropriate medical specialty makes this work critical for all trainee and early career medical practitioners and allied healthcare professionals.

[HADI PRACTICAL NEONATOLOGY BOOK 1](#) ABDELHADI ABDELGABBAR ABDELHADI, 2024-01-24 Hadi Practical Neonatology a 2 book series of practical guidelines is

intended to provide a structured approach to the management of neonatal conditions which are likely to face the neonatal team. It is not intended to replace textbooks or to teach the beginners in the field. Prior sound knowledge of Neonatal Medicine by the user is essential. This book is the first in the series. It covers aspects of RESUSCITATION, THERMAL CONTROL, RESPIRATORY, CARDIOVASCULAR, INFECTIONS, ENDOCRINE, METABOLIC, GASTROINTESTINAL, NUTRITION, DERMATOLOGY and SURGICAL NEWBORN challenges. It is my belief that neonatal doctors and nurses are an integrated team and any demarcation is an imaginary line. The recipe of creating a backbone of good nurses is passionate support, continuous education and practical teaching at every possible opportunity. Mutual trust and appropriate delegations are crucial to the success of the team. HADI PN series is written for the neonatal team and not just for the medical staff. The best way for consolidating the team knowledge and experience is bedside teaching. New methods and approaches of neonatal management are progressing but seem to slow down over the last few years. This may reflect the fact neonatal advances are approaching our era peak of what is possible. Nevertheless many of our current practices are yet to be scrutinized to fulfil the evidence based standards. There is no robust verification of the evidence behind our current practice of many routine day to day applications. This includes but not limited to fluid requirements, duration of antibiotics courses, use of various blood products, seizures, pharmacological treatment and safe PaCO<sub>2</sub> levels. I have reviewed multiple medical and nursing guidelines from Europe, North America and Australia as well as Asia, South America and Africa. I integrated many of these guidelines within this book whenever they are in accord with the international acceptable practices. Feedback and suggestions are welcome and can be sent to [neonatologypactical@gmail.com](mailto:neonatologypactical@gmail.com). The book is an updated version of the protocols and guidelines which I have developed during my work as Consultant Neonatologist. Some are adopted from various reputable institutes and modified to reflect the current evidence plus a slight flavour of my experience. Considerable effort has been exercised to ensure the doses of medications given in HADI PN are accurate. However further confirmation by the nursing and medical staff is advised prior to the first use of each medication. HADI PN reflects the author's own acceptable and safe practice and advice. It is written with the intention of facilitating the delivery of care to the most vulnerable newborn. The publication is written bearing in mind the wide variations in the skill mix of neonatal practitioners, nurses and doctors. Likewise the challenge

**Handbook of Research on Cyberchondria, Health Literacy, and the Role of Media in Society's Perception of Medical Information** Aker, Hacer, Aiken, Mary, 2021-12-17 Cyberchondria is characterized by a pattern of excessive health based search behaviors that are likely to increase health anxiety or distress heightened by ever increasing access to and normalization of technology use and the internet specifically. The internet can be a source of valuable medical information and is an efficient vehicle for awareness raising and dissemination however it can increase anxiety in audiences without medical knowledge or training and can pose a challenge to the traditional gatekeepers of medical knowledge and expertise. Technological advances are accelerating rapidly however concomitant to this acceleration an epidemic of online mis and dis

information that has the capacity to negatively impact general health health literacy and health behaviors globally now exists The World Health Organization WHO has described this information overload as an infodemic The Handbook of Research on Cyberchondria Health Literacy and the Role of Media in Society s Perception of Medical Information covers a wide range of topics from the characteristics and prevalence of cyberchondria to the pandemic policy response and cybersecurity issues relating to eHealth initiatives and pandemic related surges in cybercrime Therefore this publication has transdisciplinary relevance to professionals from healthcare government law enforcement academia the technology sector media cybersecurity and education Graduate and undergraduate students may also find it to be a beneficial resource not only in terms of the study of cyberchondria but also in terms of the psychological and sociological implications of global crisis events One of the key messages of this book is as follows All stakeholders must work together strategically to disseminate authentic public health messages during any global health crisis They must work to reduce health related anxiety mediated by technology and seek to improve critical thinking skills and global health literacy
