men undergo the demanding selection process and grueling field exercises the high level technical training and intensive language courses and the simulated battle problems that test everything from how well they gather operational intelligence to their skills at negotiating with volatile often hostile local leaders Green Berets are expected to be deadly in combat yes but their responsibilities go far beyond those of other Special Operations fighters they re taught to operate in foreign cultures often behind enemy lines to recruit train and lead local forces to gather intelligence in hostile territory to forge bonds across languages and cultures They must not only be experts in such fields as explosives communications engineering and field medicine but also be able to teach those skills to others Each and every Green Beret must function as tactical combat leader negotiator teacher drill sergeant and diplomat These tasks require more than just physical prowess they require a unique mix of character intelligence language skills and most of all adaptability It s no wonder that the Green Berets training regimen is known as the hardest in the world Drawing on his unprecedented access to the closed world of Army Special Forces training Dick Couch paints a vivid intimate portrait of these extraordinary men and the process that forges America s smartest most versatile and most valuable fighting force
