Johnston, 2012-12-06 Volume 5 of this series continues its coverage of currently active research fields in ornithology Because an editor can never be a disinterested observer of his or her own editorial efforts any claim for superiority of this volume is not without conflict of interest Even so Volume 5 has certain merits that even a parent should acknowledge and I find the current chapters not merely timely and authoritative but compelling in their demand for a reader's attention Wolfgang and Roswitha Wiltschko provide a perceptive review of magnetic orientation in birds a piece dedicated to Fritz Merkel the pioneer in studies of magnetic orientation Sergei Kharitonov and Douglas Siegel Causey are concerned with the behavioral ecology of seabird coloniality emphasizing their field experiences in the USSR and the United States Ted Miller examines the application of studies of bird behavior to comparative biology pursuing the interface of behavior and evolutionary biology adumbrated by Konrad Lorenz in the 1930s Jeremy Raynor gives us a summary of the work over the past decade on bird flight which is not by turns as complex or as simple as we had formerly believed Carrol Henderson describes recent developments in nongame bird conservation based on his pioneering work in the State of Minnesota Alan Kamil discusses optimal experimental design for research in ornithology a field in which experimental work is frequently difficult to pursue

**Research Techniques in Animal Ecology** Luigi Boitani, T. K. Fuller, 2000 This book provides an analysis of frequently used research techniques in animal ecology identifying their limitations and misuses as well as possible solutions to avoid such pitfalls The contributors provide an overarching account of central theoretical and methodological controversies The editors have forged comprehensive presentations of key topics in animal ecology such as territory and home range estimates habitation evaluation population viability analysis GIS mapping and measuring the dynamics of societies      Entangled Life Gillian Barker, Eric Desjardins, Trevor Pearce, 2013-09-05 This volume explores the interactions between organisms and their environments and how this entanglement is a fundamental aspect of all life It brings together the work and ideas of historians philosophers biologists and social scientists uniting a range of new perspectives methods and frameworks for examining and understanding the ways that organisms and environments interact The volume is organized into three main sections historical perspectives contested models and emerging frameworks The first section explores the origins of the modern idea of organism environment interaction in the mid nineteenth century and its development by later psychologists

and anthropologists In the second section a variety of controversial models from mathematical representations of evolution to model organisms in medical research are discussed and reframed in light of recent questions about the interplay between organisms and environment The third section investigates several new ideas that have the potential to reshape key aspects of the biological and social sciences Populations of organisms evolve in response to changing environments bodies and minds depend on a wide array of circumstances for their development cultures create complex relationships with the natural world even as they alter it irrevocably The chapters in this volume share a commitment to unraveling the mysteries of this entangled life

Calf and Heifer Feeding and management Zhijun Cao,Michael Van Amburgh,2020-12-11 From birth to first calving the replacement heifer undergoes tremendous changes anatomically as well as in feeding and management practices The calf changes from being a pseudo monogastric to a full ruminant within a period of two months During the same period the calf is fed colostrum milk or milk replacer and starter with or without hay Notably the lifetime milk production and health of a dairy cow is highly dependent on early life nutrition and management of the calf and subsequently the heifer Hence animal scientists continue to investigate critical areas such as colostrum feeding the level of liquid feeding gut microbial succession energy and protein levels housing health management and their interactions with the animal in an effort to help dairy producers raise successful and sustainable dairy enterprises
