doctoral symposium held during NLDB2009 as well as two invited talks. These talks covered some of the currently hot topics in the use of natural language for accessing information systems. We received 51 submissions as regular papers for the main conference, 2 extra submissions as posters and 3 short papers for the doctoral symposium. Each paper for the main conference was assigned four reviewers taking into account preferences expressed by the Program Committee members as much as possible. Within the review deadline we received at least three reviews for almost all submissions. After the review deadline the Conference Organizing Committee members and the Program Committee Chair acted as meta reviewers. This task included studying the reviews and the papers, especially those whose assessment made them borderline cases and discussing conflicting opinions and their impact on the assessment of individual papers. Finally the meta reviewers wrote additional reviews for the few papers which received less than three reviews as well as for papers which received reviews with considerably conflicting assessments.
