Resources in Education ,1993 *Teaching Powerful Problem-Solving in Math* Catherine C. Lewis, Akihiko Takahashi, Shelley Friedkin, Nora Houseman, Sara Liebert, 2025-08-22 *Teaching Powerful Problem Solving in Math* provides the first in depth portrait of schoolwide lesson study showing how U S teachers at several schools used it to implement powerful problem based mathematics instruction Students learn mathematics by confronting a novel problem and building the new understanding of the mathematical concepts needed to solve it just as mathematicians would By learning in this way students discover the power of their own thinking and gain confidence that extends well beyond mathematics This book introduces readers to urban elementary and K 8 schools where teachers have dramatically transformed math learning for teachers and for students Readers will follow teachers as they transform instruction using schoolwide lesson study building powerful new ways for educators to learn from each other and practice innovative teaching techniques The authors use in depth classroom portraits from the outset of schoolwide lesson study and three years later to illuminate the changes in mathematics instruction at a school that raised its proficiency on Smarter Balanced Assessment from 15% to 56% Extensive resources and links are provided to help readers understand and build on the work of these schools which is grounded in established principles of collective efficacy intrinsic motivation and learner agency for both students and teachers Book Features Shows how teaching through problem solving can erase the achievement gap in mathematics learning Provides the first in depth portrait of schoolwide lesson study showing how U S teachers at several schools build it and use it to transform teaching Profiles teachers leading the transformation of instruction to achieve the ambitious vision of learning embodied in recent standards Uses photographs student work and detailed classroom descriptions to bring to life mathematics lessons in year 1 and year 4 of the school s work to build problem solving Provides examples and links to the strategies teachers use to make student thinking visible and actionable during mathematics lessons Includes lesson plans photographs of board work

student journals school newsletters self assessment rubrics and dozens of links to the resources needed to begin using teaching through problem solving and school wide lesson study Provides long term teacher led solutions for professional learning and for mathematics instruction that have been shown to improve teacher retention and student proficiency

Formative Assessment Margaret Heritage,2021-08-18 Develop the knowledge and skills needed for successful formative assessment Formative assessment is a process used by teachers and students to keep learning moving forward In the 10 years since the first edition of Formative Assessment was published the practice has become a mainstay in classrooms but that does not mean that it is easy Education expert Margaret Heritage walks readers through every step of implementation and offers numerous examples that illustrate formative assessment practices across a range of subjects and grade levels She explains how to articulate learning progressions goals and success criteria select assessment strategies and provide quality feedback engage students in self assessment and self management and create an environment that values feedback as part of the learning process Based on the latest research this second edition addresses College and career readiness standards Common Core State Standards and Next Generation Science Standards Equity and individual learning needs Discipline based and student centered formative assessment Social and emotional learning Written for teachers and those who support them this book will help all educators develop the skills necessary to get students on the path to success **Academic Belonging in Higher Education** Eréndira Rueda,Candice Lowe Swift,2023-12-13 The concept of belonging has been increasingly understood as the missing piece in diversity equity and inclusion efforts in higher education This book explores the need to recognize and account for institutional level factors that shape academic belonging thereby improving student experience and outcomes Though recent scholarship has identified several factors that are associated with student belonging in academics there is little research that addresses what faculty can do in concrete terms to promote belonging particularly in the domains where they have the most influence The 12 chapters in this volume introduce readers to an array of collaborative cutting edge efforts to develop pedagogies programs strategies and environments that help students develop academic belonging that is a sense of connection competence and confidence in academic domains This book is written for higher education faculty administrators and researchers who wish to enhance their students sense of academic belonging by taking informed practical measures to make them feel valued and supported [Current Index to Journals in Education](#) ,1998

Math Wars Carmen Latterell,2004-12-30 This book is written for parents and other interested parties so that they can understand the great debate taking place in many states in this country about how to teach basic math The debate centers around the standards written by the National Council of Teachers of Mathematics NCTM which call for a radically different approach to mathematics education Because the issues are so heated between the NCTM oriented curricula and traditional curricula the curricula that NCTM oriented replaced the term Math Wars was coined to describe them Parents are concerned about their children s math learning Teachers are concerned about math teaching When parents see what children are

bringing home under the new curriculum it is clear that their children are not working on the same mathematics that parents remember from the time when they were in school But the problem goes beyond grades K 12 Post secondary mathematics courses are the fear of many students The standards created by the NCTM do not necessarily prepare students for success either on SATs or in college Besides lack of knowledge about mathematics education many parents have an additional problem in that they feel they lack knowledge in mathematics itself This is very intimidating thus it is difficult for parents to do anything about the confusing state of mathematics education This book provides some answers *Addressing the Needs of All Learners in the Era of Changing Standards* Katherine S. McKnight, 2016-06-08 The new standards were written to address the harsh realities for poor performance of American students across all grades levels k 12 According to NAEP National Assessment of Educational Progress data more than 60% of our students in grades 4 8 and 12 are not proficient readers and the United States is one of the lowest performing in mathematics The statistics are even more staggering for our children who live in poverty students with disabilities and English Language Learners The new standards have sent a clear message all students must be engaged deeper learning This deeper level of understanding and comprehension is communicated through a more sophisticated and independent level of applied literacy skills In this book some of our leading educators envision the standards as a vehicle to provide more rigorous instruction and illustrate how teachers are uniquely qualified to determine the most effective methods for developing students skills and close the achievement gap **New Horizons in Mathematics and Science Education** ,2001 **Frameworks for Integrated Project-Based Instruction in STEM Disciplines** Anthony J. Petrosino, Candace Walkington, Denise Ekberg, 2024-01-01 Frameworks for Integrated Project Based Instruction in STEM Disciplines presents an original approach to Science Technology Engineering and Mathematics STEM centric project based instruction We approach project based instruction from an engineering design philosophy and the accountability highlighted in a standards based environment We emphasize a backward design that is initiated by well defined outcomes tied to local state or national standards that provide teachers with a framework guiding students design solving or completion of ill defined tasks In project based STEM classrooms students investigate utilize technological tools construct artifacts participate in debates collaborate and make products to demonstrate what they have learned Features include deep coverage of four topics in PBI scaffolding student driven inquiry driving questions and development of lessons based on national and state standards This focus will ensure a deep understanding by the reader of project based instruction which will allow the reader to create strong and meaningful lesson experiences for their students An emphasis on student driven inquiry will be discussed including the importance of giving students the cognitive tools such as statistical analysis tools they need to research and inquire about the lesson topic A breakdown of what a successful driving question includes will be explained and examples given The book will include strategies for starting the lesson process with ending goals in mind by creating driving questions and breaking down state and national standards This book is strongly

rooted in research in the learning sciences about project based instruction but will also be designed to be practically useful to teachers and teacher educators and researchers by bridging research and practice Tomorrow's High School Gene Bottoms, 2022-04-11 How do some high schools produce graduates that consistently achieve at high levels Would you believe there s a set of proven strategies that could help you deliver similar impressive results and better prepare students for the world after high school High schools in the United States face a startling reality many graduates are unprepared for success in postsecondary studies or for high demand well paying jobs in a rapidly changing economy Although this situation is alarming the high schools that have embraced new ways of learning show us what is possible Drawing from his experience with the High Schools That Work initiative Gene Bottoms offers educators a path forward by urging them to pursue bold goals and outlining bold actions for achieving those goals His vision is clear replace the traditional model of secondary education with one that engages students in a rigorous curriculum that combines a solid academic core with intellectually demanding career pathway courses The notion that nearly all students can achieve at high levels is borne out by numerous examples of high schools including those with traditionally underperforming student populations that have used key strategies to help all students realize their potential Bottoms explains the root causes of the current shortcomings in high school education and then specifies critical components of successful transformation Shared leadership Powerful assignments especially in math literacy and career technical education planned and executed by academic and career pathway teachers working together Strengthened connections between middle school and high school A redesigned senior year and Comprehensive counseling and advisory programs Provocative and persuasive in its sense of urgency Tomorrow s High School offers proven and practical solutions to finally make high schools a rich and rewarding experience for all students whatever their future college and career goals may be This book is a copublication of ASCD and SREB It includes access to nine downloadable appendixes **Biennial Budget Request** Wisconsin.
