Improper building wiring should be corrected by a qualified electrician. Do not use the Back-UPS until the condition that caused the fault is corrected.

Load - is to indicate power demand for connected equipment.

Battery - is to indicate the battery of the Back-UPS is providing equipment connected to the Battery Backup system.

Overload - is to indicate power demand for connected capacity of the Back-UPS.

Alarm - is to indicate the battery is near the end of its useful life, or if the battery is not connected properly. A battery that is near the end of its useful life has insufficient run-time and should be replaced.
