Jump at Home Grade 5 John Mighton, 2010-06-01 John Mighton's JUMP program is changing the way math is taught and his powerful math workbooks give children the tools they need to master this crucial subject. The key is a step by step teaching method that isolates and describes concepts so clearly that anyone can understand them. Students build on their successes becoming proficient at solving problems with confidence and enthusiasm. Now parents and caregivers can bring the JUMP program home. These workbooks follow the current student worksheets used by JUMP tutors and classroom teachers including an introduction for parents and caregivers that clearly explains the thinking behind the program and provides hours of activities worksheets carefully designed to enable children to move from one success to the next, a glossary of math terms and a selected answer key. **JUMP Math. The End of Ignorance John Mighton, 2011-06-01 A revolutionary call for a new understanding of how people learn The End of Ignorance conceives of a world in which no child is left behind a world based on the assumption that each child has the potential to be successful in every subject John Mighton argues that by recognizing the barriers that we have experienced in our own educational development by identifying the moment that we became disenchanted with a certain subject and forever closed ourselves off to it we will be able to eliminate these same barriers from standing in the way of our children A passionate examination of our present education system The End of Ignorance shows how we all can work together to reinvent the way that we are taught

The Imagination in Education Sean Blenkinsop, 2009 This collection of essays from scholars in eleven countries centres upon the theory and practice of the use of imagination in education By bringing together studies covering a wide range of subject matter we trust that the reader will have the opportunity to appreciate both the diversity within the field and the significance of the topics discussed We hope too that readers will find connections to their own areas of study The 13 essays present distinct yet converging points of view whether it be a discussion of the imagination as a virtue the use of imagination as a means to improve aboriginal education in Northern Canada or the description of a museum in Brazil in which the imagination of the child is central to the project Separately each of the papers identifies and explores a distinct aspect of Imaginative Education together they begin to define the breadth and richness of the field These essays have been selected from papers presented over a period of several years to research symposiums in imagination and education held every summer in Vancouver Canada under the auspices of the Imaginative Education Research Group in the Faculty of Education at Simon Fraser University

Learning and Teaching Early Math Douglas H. Clements, Julie Sarama, 2020-12-29 The third edition of

this significant and groundbreaking book summarizes current research into how young children learn mathematics and how best to develop foundational knowledge to realize more effective teaching Using straightforward practical language early math experts Douglas Clements and Julie Sarama show how learning trajectories help teachers understand children s level of mathematical understanding and lead to better teaching By focusing on the inherent delight and curiosity behind young children s mathematical reasoning learning trajectories ultimately make teaching more joyous helping teachers understand the varying levels of knowledge exhibited by individual students it allows them to better meet the learning needs of all children This thoroughly revised and contemporary third edition of Learning and Teaching Early Math remains the definitive research based resource to help teachers understand the learning trajectories of early mathematics and become confident credible professionals The new edition draws on numerous new research studies offers expanded international examples and includes updated illustrations throughout This new edition is closely linked with Learning and Teaching with Learning Trajectories LT 2 an open access web based tool for early childhood educators to learn about how children think and learn about mathematics Head to LearningTrajectories org for ongoing updates interactive games and practical tools that support classroom learning
