challenge of feeding the world's growing population more difficult than ever before. The tropical fruit sector is particularly at risk from the negative impacts of climate change driven by rising temperatures, extreme weather events and associated challenges such as water stress and increased pests and diseases. This poses significant risks for the long-term sustainability of production and trade of important tropical fruits including avocados. Recognizing these challenges, the Responsible Fruits Project has developed this technical guide on climate change adaptation for the avocado export industry. The guide is for producers and exporters of avocado who are interested in learning more about climate change in the context of their own business systems. It was developed through a consultative process with avocado companies and producer organizations participating in the Responsible Fruits Project. The purpose of this technical guide is to provide up-to-date information on recent and predicted climate change effects and trends in key avocado producing and exporting countries. Identify climate change risks and impacts on the production and trade of avocado. Identify adaptation practices and recommendations that may help to address these risks, minimize negative impacts and build resilience. Share good practices adopted by companies to address specific climate-related production risks in a sustainable manner. Identify gaps in information research and technical solutions needed to strengthen the availability and adoption of adaptation practices.

Author Estrategia de adaptación al cambio climático para la industria de las frutas tropicales: una guía técnica para productores y exportadores de piña Organización de las Naciones Unidas para la Agricultura y la Alimentación, 2024-03-28

El cambio climático está afectando a los sistemas mundiales de producción de alimentos haciendo que el reto de alimentar a la creciente población mundial sea más difícil que nunca. El sector de las frutas tropicales está especialmente amenazado por los efectos negativos del cambio climático impulsado por el aumento de las temperaturas los fenómenos meteorológicos extremos y los problemas asociados como el estrés hídrico y el aumento de plagas y enfermedades. Esto plantea riesgos significativos para la sostenibilidad a largo plazo de la producción y el comercio de frutas tropicales importantes incluido el aguacate. Reconociendo estos retos el Proyecto de Frutas Responsables ha desarrollado esta guía técnica sobre adaptación al cambio climático para la industria exportadora de piña. La guía está dirigida a productores y exportadores de aguacate interesados en aprender más sobre el cambio climático en el contexto de sus propios sistemas empresariales. Fue desarrollada a través de un proceso consultivo con empresas aguacateras y organizaciones de productores participantes en el Proyecto de Frutas Responsables. El propósito de esta guía técnica es proporcionar información actualizada sobre los efectos y tendencias recientes y previstas del cambio climático en los principales países productores y exportadores de piña identificar los riesgos e impactos del cambio climático en la producción y el comercio de la piña identificar prácticas de adaptación y recomendaciones que puedan ayudar a abordar estos riesgos minimizar los impactos negativos y aumentar la resiliencia compartir buenas prácticas adoptadas por las empresas para abordar de manera sostenible riesgos específicos de la producción relacionados con el clima e identificar las lagunas en la información la investigación y las soluciones técnicas necesarias para reforzar la disponibilidad y la adopción de prácticas de adaptación.

Animal Agriculture Fuller W. Bazer, G. Cliff Lamb, Guoyao Wu, 2019-10-25

Animal Agriculture Sustainability Challenges and Innovations discusses the land based production of high quality protein by livestock and poultry and how it plays an important role in improving human nutrition growth and health. With exponential growth of the global population and marked rises in meat consumption per capita demands for animal source protein are expected to increase 72% between 2013 and 2050. This raises concerns about the sustainability and environmental impacts of animal agriculture. An attractive solution to meeting increasing needs for animal products and mitigating undesirable effects of agricultural practices is to enhance the efficiency of animal growth reproduction and lactation. Currently there is no resource that offers specific knowledge of both animal science and technology including biotechnology for the sustainability of animal agriculture for the expanding global demand of food in the face of diminishing resources. This book fills that gap giving readers all the necessary information on important issues facing modern animal agriculture namely its sustainability challenges and innovative solutions. Integrates new knowledge in animal breeding biotechnology nutrition reproduction and management. Addresses the urgent issue of sustainability in modern

animal agriculture Provides practical solutions on how to solve the current and future problems that face animal agriculture worldwide

Adaptation au changement climatique dans le secteur des fruits tropicaux: guide technique adressé aux producteurs et exportateurs d'ananas Organisation des Nations Unies pour l'alimentation et l'agriculture, 2024-04-12

Le changement climatique a un impact sur les systèmes de production alimentaire mondiaux rendant plus difficile que jamais le défi de nourrir la population mondiale croissante

Author Le secteur des fruits tropicaux est particulièrement menacé par les effets négatifs du changement climatique dus à la hausse des températures aux phénomènes météorologiques extrêmes et aux problèmes connexes notamment le stress hydrique et la recrudescence des ravageurs et des maladies
