Downing,2019-05-24 This book proceeds from a single and very simple observation throughout history and up to the present women have received a clear message that we are not supposed to prioritize ourselves Indeed the whole question of self is a problem for women and a problem that issues from a wide range of locations including in some cases feminism itself When women espouse discourses of self interest self regard and selfishness they become illegible This is complicated by the commodification of the self in the recent Western mode of economic and political organization known as neoliberalism which encourages a focus on self fashioning that may not be identical with self regard or self interest Drawing on figures from French US and UK contexts including Rachilde Ayn Rand Margaret Thatcher and Lionel Shriver and examining discourses from psychiatry media and feminism with the aim of reading against the grain of multiple orthodoxies this book asks how revisiting the words and works of selfish women of modernity can assist us in understanding our fraught individual and collective identities as women in contemporary culture And can women with politics that are contrary to the interests of the collective teach us anything about the value of rethinking the role of the individual This book is an essential read for those with interests in cultural theory feminist theory and gender politics **Assessing sanitary mixtures in East African**

**cities** Sammy C. Letema,2023-09-04 It has been common for both scientists and policy makers to view sanitary provision as a dichotomy between a centralised and a decentralised approach Moreover sustainability assessment has also been characterized by a dualistic approach between the techno centric and the eco centric Such views are often simplistic and not in tandem with the existing multiple sanitary options and service providers in East African cities which defy such classification This book provides the theoretical and empirical basis for a third way of classifying and assessing the multiple technical and institutional options to sanitary provision This novel assessment approach called modernised mixtures is used in this book as a tool for conceptualising assessing and improving sanitary provision in East African cities The assessment is based on four social and technical dimensions and three sustainability criteria This inclusive approach in assessing sanitary mixtures benefits decision making among imperfect options **Geographies of Health, Disease and Well-being** Mei-Po
