Kralchevsky, Reinhard Miller, Francesca Ravera, 2016-04-19 Colloid and interface science dealt with nanoscale objects for nearly a century before the term nanotechnology was coined An interdisciplinary field it bridges the macroscopic world and the small world of atoms and molecules Colloid and Interface Chemistry for Nanotechnology is a collection of manuscripts reflecting the activities of research te      **Atomic Force Microscopy in Adhesion Studies** J. Drelich, Kash L.

Mittal, 2005-10-01 Since its discovery Atomic Force Microscopy AFM has become a technique of choice for non destructive surface characterization with sub molecular resolution The AFM has also emerged as a problem solving tool in applications relevant to particle solid and particle liquid interactions design fabrication and characterization of new materials and development of new technologies for processing and modification of materials This volume is a comprehensive review of AFM techniques and their application in adhesion studies It is intended for both researchers and students in engineering disciplines physics and biology Over 100 authors contributed to this book summarizing current status of research on measurements of colloidal particle solid adhesion and molecular forces solid surface imaging and mapping and discussing the contact mechanics models applicable to particle substrate and particle particle systems      **Preservation and Restoration**

**Techniques for Ancient Egyptian Textiles** Ahmed, Harby E., Al-Zahrani, Abdulnaser Abdulrahman, 2022-12-19

Preservation and restoration techniques are essential in maintaining the integrity of historic artifacts including textiles and specifically the materials of the textile industry in Egypt The technologies methods and advancements in preserving these ancient artifacts are growing areas of research and important factors in increasing knowledge of the conservation process By offering and increasing the knowledge field with practical applications of preservation and restoration techniques both old and new the industry will continue to advance Preservation and Restoration Techniques for Ancient Egyptian Textiles provides critical research on the history technology and materials of the textile industry in Egypt through the ages It includes the integration of scientific examinations and digital precise documentation in the preservation of Ancient Egyptian textiles the deterioration aspects and their effect on historical textiles and novelty preservation methods and the preventive conservation of historical textiles in museums The book deals with the restoration methods of historical textiles such as documentation various cleaning processes fixing supporting display and storage methods as well as incorporating modern science techniques such as nanoscience enzymes plasma lasers and more It is essential for historians and archeologists conservators specialists in art history museum specialists restoration professionals practitioners researchers academicians and students interested in the latest conservation and restoration techniques specifically focused on ancient Egyptian textiles

Water in Mineral Processing Jaroslaw Drelich, Jiann-Yang Hwang, 2012 One of the major challenges confronting the mining and minerals processing industry in the 21st century will be managing in an environment of ever decreasing water

resources Because most mineral processing requires high water use there will be even more urgency to develop and employ sustainable technologies that will reduce consumption and the discharge of process affected water Water in Mineral Processing provides a comprehensive state of the art examination of this vital issue A compilation of papers presented at the First International Symposium on Water in Mineral Processing this book shares the insights of dozens of respected experts from industry and academia A significant portion of the content is devoted to saline solutions and processing with sea water Other chapters explore the latest in water treatment and biological methods the effect of water quality on minerals processing and water and tailings management Water in Mineral Processing is an authoritative first of its kind resource that can help mining practitioners apply innovative water use and purification technologies in the demanding years ahead

**MXenes** Yury Gogotsi,2023-08-24 Since their discovery in 2011 MXenes 2D carbides nitrides and carbonitrides of early transition metals have developed into one of the largest and most intensively studied families of 2D materials They offer unique properties and are being explored in a large variety of applications This book compiles the most important research from a pioneer of the field Professor Yury Gogotsi and his interdisciplinary research team as well as numerous collaborators worldwide It reports on the discovery and rise of MXenes and describes their synthesis and processing properties and incorporation into polymer ceramic and metal matrices to produce composites It also discusses the potential of MXenes for use in energy storage optics electronics and sensing as well as biomedical environmental and electrocatalysis applications The book will appeal to anyone interested in nanomaterials and their synthesis properties and applications **Polymer**

Rashed,P.N. Palanisamy,2018-06-27 Zeolites are hydrated aluminosilicate minerals of the family of microporous solids

According to the US Geological Survey there are about 40 naturally occurring zeolites forming in sedimentary and volcanic rocks. The most commonly mined forms include clinoptilolite, chabazite and mordenite. There are over 200 synthetic zeolites. For their abundance, natural and synthetic zeolites are widely used in the industry, agriculture, water treatment, wastewater treatment and as dietary supplements to treat diarrhea, autism, cancer and other. This book, *Zeolites and Their Applications*, deals with several aspects of zeolite morphology, synthesis and applications. The book is divided into three sections and structured into nine chapters. The first section includes the introductory chapter, the second section explains mineralogy, morphology and synthesis of zeolites, and the third section focuses on the different applications of both natural and synthetic zeolites. So in this book, the readers will obtain updated information on mineralogy, morphology, synthesis and application of zeolites. Scientists from different scientific fields reported in this book their findings. JJAP, 2007 **Selected**

Zheng, 2018-07-13 Japanese Journal of Applied Physics, 2007 Advanced Cell and Molecular Techniques Karuppusamy Arunachalam, Puthanpura Sasidharan Sreeja, 2025-04-23 This detailed volume explores laboratory protocols and methodologies for studying cell cultures, genetic analysis and various biochemical assays. The chapters within this book cover a wide range of techniques from basic cell culture methods to more specialized assays used in the study of genotoxicity, apoptosis and gene expression, not only relevant to academic researchers but also to professionals in the pharmaceutical, biotechnological and clinical fields. Written for the Springer Protocols Handbooks series, each protocol has been carefully compiled to provide step by step instructions ensuring clarity and reproducibility.
